Air Cylinder

Ø32, Ø40, Ø50, Ø63, Ø80, Ø100, Ø125

New Series MB

Current model

0.91 kg ⁴⁴1.01 kg

Reduced weight by changing the shape of the rod cover and head cover.

Non-rotating rod type
 MBK-Z series (Single rod) and
 MBKW-Z series (Double rod) added.

Series MB

CAT.ES20-231D

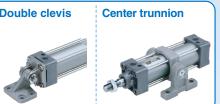

Part numbers with rod end bracket and/or pivot bracket available

Not necessary to order a bracket for the applicable cylinder separately Note) Mounting bracket is shipped together with the product, but not assembled.

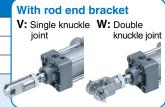

> Example) MDBD-40-100Z- N V -M9BW Mounting style

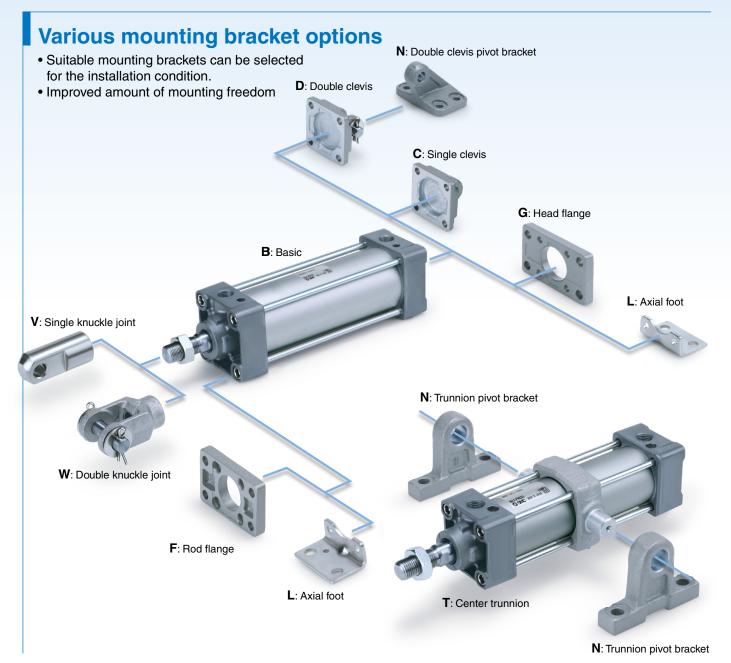

Pivot	bracket	Dou
Nil	No bracket	
N	Pivot bracket is shipped together with the product, but not assembled.	

Rod end bracket									
nou e	Hou end bracket								
Nil	No bracket								
٧	Single knuckle joint								
W	Double knuckle joint								

Port

Lightweight

Reduced weight by changing the shape of the rod cover and head cover.

			[49]
Bore size [mm]	MB	Reduction rate [%]	Current model
32	0.66	8	0.72
40	0.91	10	1.01
50	1.56	9	1.71
63	1.83	9	2.01
80	3.25	9	3.57
100	4.48	7	4.82
125	6.90	0	6.90

* At 100 stroke

Applicable speed/load

- Piston speed: Max. **1000** mm/s (ø32 to ø125) Load yield: See table below.

Bore size [mm]	Maximum load mass
32	80
40	140
50	190
63	310
80	500
100	800
125	1300

* Speed: 200 mm/s

Various switches such as compact auto switches and magnetic field resistant auto switches can be mounted.

Compact auto switches

- D-M9□
- · D-A9□

Magnetic field resistant auto switches

- D-P3DW*1
- · D-P3DWA
- · D-P4DW
- *1 ø32 only

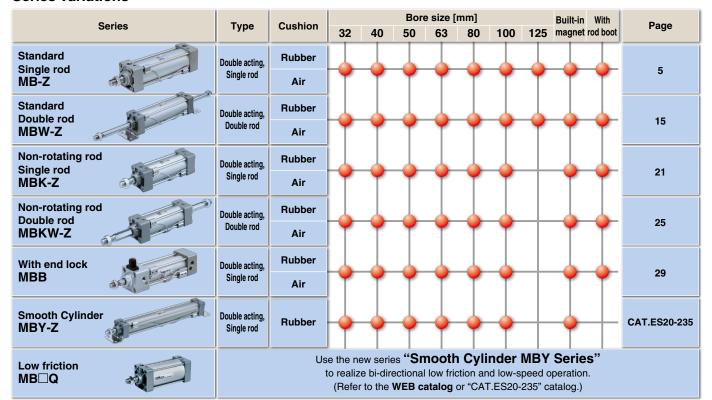

Mounting dimensions are the same as the current

No environmental hazardous substances used

Lead free bushing is used as sliding material. Compliant with EU RoHS directive.

Note 1) For details, refer to the **WEB catalog**.

Note 2) For details about the smooth cylinder, refer to the **WEB catalog** or "CAT.ES20-235" catalog.

Note 3) Simple specials except XC14A and XC14B.

Note 4) XC10 specification for the MBK-Z series is the non-rotating type on both sides. For only one side, submit a special order request form.

Note 5) Copper-free for the externally exposed part.

Use the new series "Smooth Cylinder MBY Series" to realize bi-directional low friction and low-speed operation. (Refer to the **WEB catalog** or "CAT.ES20-235" catalog.)

Note 6) The cover shape is the same as the current product.

Note 7) The XC3BB, XC3CC and XC3DD with trunnion bracket are available with new models (part numbers with "Z").

Note 8) The piston rod of the MBK-Z series is made of stainless steel. The rod end nut made of stainless steel is available with X1292.

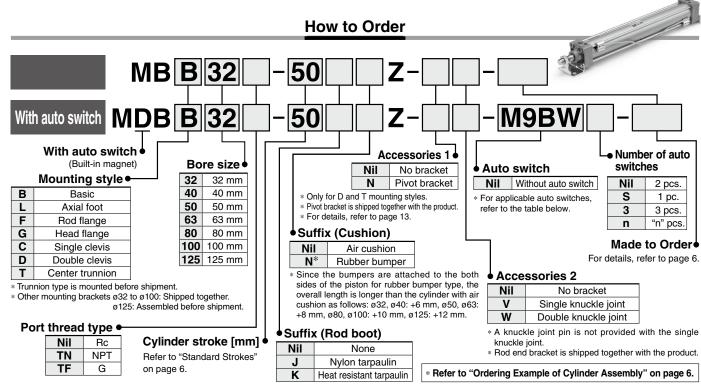

Note 9) The copper and fluorine-free specification is available as a standard product.

Air Cylinder: Standard Type **Double Acting, Single Rod**

Series MB

Ø32, Ø40, Ø50, Ø63, Ø80, Ø100, Ø125

Applicable Auto Switches/Refer to the WEB catalog or the Best Pneumatics No. 2 for further information on auto switches.

*1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance.

A water resistant type cylinder is recommended for use in an environment which requires water resistance. * Lead wire length symbols: 0.5 m-----Nil (Example) M9NW

1 m----- M (Example) M9NWM 5 m----- Z

3 m----- L (Example) M9NWL (Example) M9NWZ

* Solid state auto switches marked with "O" are produced upon receipt of order.

* Since there are other applicable auto switches than listed above, refer to page 45 for details.

* For details about auto switches with pre-wired connector, refer to the WEB catalog or the Best Pneumatics No. 2. For the D-P3DWA□, refer to the **WEB catalog**.

* The D-A9□/M9□□□/P3DWA□ auto switches are shipped together, (but not assembled). (However, auto switch mounting brackets are assembled for the D-A9□/M9□□□ before shipment.) *** The D-P3DWA cannot be mounted on ø32. Use the D-P3DW.

ow Friction

-XC89	Spatter resistant coil scraper, Lube-retainer, Grease for welding (Piston rod: S45C)
-XC91	Spatter resistant coil scraper, Grease for welding (Piston rod: S45C) $ \label{eq:spatter}$
-X1184	Cylinder with heat resistant reed auto switch (–10 to 120°C)

- *1 Air cushion only
- *2 Except ø125
- *3 The cover shape is the same as the current product.
- *4 ø125 only

For special port location (-XC3), the mounting bracket and port location can be determined using the standard product corresponding to the operating conditions. Also, this is only applicable to -XC3BB, -XC3CC and -XC3DD with trunnion bracket.

For parts made of stainless steel (-XC6), use the same specification stainless steel with the surface treatment (with hard chrome plated piston rod) (-XC68).

Note 1) Manufacture of intermediate strokes is possible. (Spacers are not used.)

Note 2) Applicable strokes should be confirmed according to the usage. For details, refer to "Air Cylinders Model Selection" on front matter pages of the Best Pneumatics No. 2 or the **WEB catalog**. In addition, the products that exceed the stroke range ① might not be able to fulfill the specifications due to the deflection etc.

Note 3) Please consult with SMC for manufacturability and the part numbers when exceeding the stroke range ②. Note 4) The stroke range with rod boot is up to 1000 mm. Please consult with SMC when exceeding 1000 mm strokes.

Ordering Example of Cylinder Assembly

Cylinder model: MDBD32-50Z-NW-M9BW

Mounting D: Double clevis Pivot bracket N: Yes Rod end bracket W: Double knuckle joint Auto switch D-M9BW: 2 pcs.

* Pivot bracket, double knuckle joint and auto switch are shipped together with the product, but not assembled.

Refer to pages 38 to 45 for cylinders with auto switches.

- Auto switch proper mounting position (detection at stroke end) and its mounting height
- Minimum stroke for auto switch mounting
- Auto switch mounting brackets/Part no.
- Operating range

Calculation

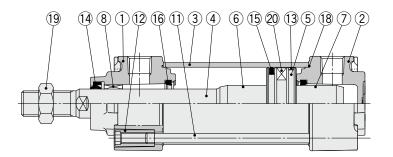

Example) MBB32-100Z (Basic, ø32, 100 stroke) • Basic weight 0.44 (Basic, ø32)

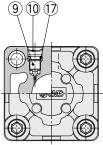

Additional weight ----- 0.11/50 stroke

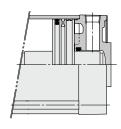

Cylinder stroke ----- 100 stroke

 $0.44 + 0.11 \times 100/50 = 0.66 \text{ kg}$

With End Lock

MB125

- * Seal kits consist of items (4), (5), (6), (8), and can be ordered by using the seal kit number corresponding to each bore size.
- st Center trunnion type should not be disassembled. (Refer to page 64.)
- * The seal kit includes a grease pack (10 g for ø32 to ø50, 20 g for ø63 and ø80, 30 g for ø100 and ø125).

Order with the following part number when only the grease pack is needed. **Grease pack part number: GR-S-010** (10 g), **GR-S-020** (20 g)

Water Resistant Air Cylinder

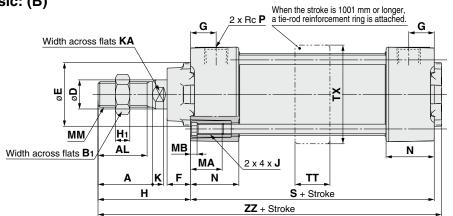

Water resistant air cylinders are also available in the MB series, which are suitable for use on machine tools, where exposure to coolant is possible and applicable for food machinery and automobile washing equipment in an environment where water splashes. Please refer to the **WEB catalog** or the Best Pneumatics No. 2 for more information.

- *1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance. Please contact SMC regarding water resistant types with the above model numbers.
- st Solid state auto switches marked with "O" are produced upon receipt of order.
- * Since there are other applicable auto switches than listed above, refer to page 45 for details.
- * For details about auto switches with pre-wired connector, refer to the **WEB catalog** or the Best Pneumatics No. 2. For the D-P3DWA□, refer to the **WEB catalog**.
- * The D-A9□/M9□□□/P3DWA□ auto switches are shipped together, (but not assembled). (However, auto switch mounting brackets are assembled for the D-A9□/M9□□□ before shipment.)

 *** The D-P3DWA cannot be mounted on ø32. Use the D-P3DW.

Symbol

Double acting, Air cushion

Made to Order (For details, refer to pages 47 to 63.)

	, , ,
Symbol	Specifications
-ХА□	Change of rod end shape
-XB6	Heat resistant cylinder (-10 to 150°C)
-XC3	Special port location*1 *2
-XC4	With heavy duty scraper
-XC5	Heat resistant cylinder (-10 to 110°C)
-XC7	Tie-rod, cushion valve, tie-rod nut, etc. made of stainless steel
-XC14	Change of trunnion bracket mounting position
-XC22	Fluororubber seal
-XC30	Rod trunnion
-XC35	With coil scraper
-XC68	Made of stainless steel (with hard chrome plated piston rod)*3
-XC88	Spatter resistant coil scraper, Lube-retainer, Grease for welding (Piston rod: Stainless steel 304)
-XC89	Spatter resistant coil scraper, Lube-retainer, Grease for welding (Piston rod: S45C)
-XC91	Spatter resistant coil scraper, Grease for welding (Piston rod: S45C)

- *1 The cover shape is the same as the current product.
- *2 ø125 only
- *3 Except Ø125

For special port location (-XC3), the mounting bracket and port location can be determined using the standard product corresponding to the operating conditions. Also, this is only applicable to -XC3BB, -XC3CC and -XC3DD with trunnion bracket.

For parts made of stainless steel (-XC6), use the same specification stainless steel with the surface treatment (with hard chrome plated piston rod) (-XC68).

Refer to pages 38 to 45 for cylinders with auto switches.

- Auto switch proper mounting position (detection at stroke end) and its mounting height
- Minimum stroke for auto switch mounting
- Auto switch mounting brackets/Part no.
- Operating range

Water Resistant Air Cylinder

Water resistant air cylinders are also available in the MB series, which are suitable for use on machine tools in an atmosphere with coolant and applicable to food machinery and automobile washing equipment in an environment with water splashes. Please refer to the **WEB catalog** or the Best Pneumatics No. 2 for more information.

Specifications

Bore size [mm]	32	40	50	63	80	100	125						
Action			Double	acting, Do	uble rod								
Fluid				Air									
Proof pressure				1.5 MPa									
Max. operating pressure	sure 1.0 MPa												
Min. operating pressure				0.05 MPa									
Ambient and fluid temperature		Withou With	t auto switch	h: –10 to 7 h: –10 to 6	0°C (No fre	eezing)							
Lubrication			Not re	quired (No	n-lube)								
Operating piston speed			50 to 10	00 mm/s			50 to 700 mm/s						
Allowable stroke tolerance		Up to 2	50: ^{+1.0} , 25	1 to 1000:	^{+1.4} ₀ , 1001	to 1500							
Cushion Note)			Air cushic	n or Rubbe	er bumper								
Port size (Rc, NPT, G)	1/8	1,	/4	3,	/8	1	/2						
Mounting	Basic, Axial foot, Rod flange, Center trunnion												

Note) Kinetic energy absorbable by the cushion mechanism is identical to double acting, single rod.

Standard Strokes

			[mm]
Bore	Standard stroke		Max. manufacturable
size	Stroke range ①	Stroke range ②	stroke
32	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500	Up to 1000	
40	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500	Op 10 1000	
50	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600	Up to 1200	
63	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600	Op 10 1200	Up to 1800
80	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800		1000
100	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800	Up to 1500	
125	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800, 900, 1000		

Note 1) Manufacture of intermediate strokes is possible. (Spacers are not used.)

Note 2) Applicable strokes should be confirmed according to the usage. For details, refer to "Air Cylinders Model Selection" on front matter pages of the Best Pneumatics No. 2 or the **WEB catalog**. In addition, the products that exceed the stroke range ① might not be able to fulfill the specifications due to the deflection etc.

Note 3) Please consult with SMC for manufacturability and the part numbers when exceeding the stroke range ②. Note 4) The stroke range with rod boot is up to 1000 mm. Please consult with SMC when exceeding 1000 mm

- *1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance.
- A water resistant type cylinder is recommended for use in an environment which requires water resistance.
- 0.5 m Nil (Example) M9NW 3 m L (Example) M9NWL * Lead wire length symbols: 1 m ······ M (Example) M9NWM 5 m Z (Example) M9NWZ
- * Solid state auto switches marked with "O" are produced upon receipt of order.
- * Since there are other applicable auto switches than listed above, refer to page 45 for details.
- * For details about auto switches with pre-wired connector, refer to the WEB catalog or the Best Pneumatics No. 2. For the D-P3DWA□, refer to the **WEB catalog**.
- · The D-A9□/M9□□□/P3DWA□ auto switches are shipped together, (but not assembled). (However, auto switch mounting brackets are assembled for the D-A9□/M9□□□ before shipment.) *** The D-P3DWA cannot be mounted on ø32. Use the D-P3DW.

Low Friction

Specifications

Symbol Double acting, Air cushion	
Double dolling, 7 th oddsilon

^{*} Model without air cushion is designed to include rubber bumpers. The overall length is longer than the cylinder with air cushion as follows because the bumpers are attached to the both sides of the piston; ø32, ø40: +6 mm, ø50, ø63: +8 mm, ø80, ø100: +10 mm

The dimensions for each mounting style are the same as those for standard model (double acting, double rod). Refer to pages 19 and 20.

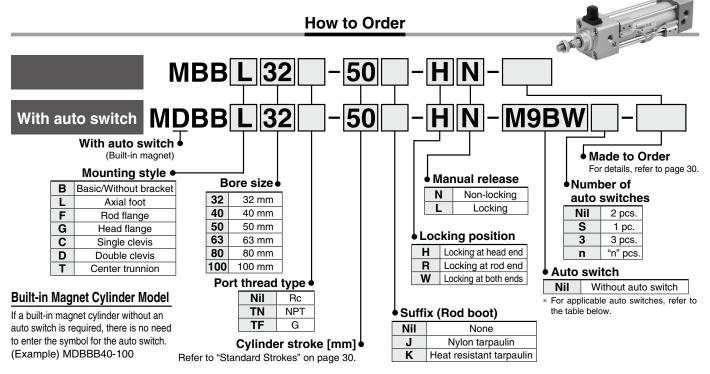

Air Cylinder: With End Lock

Calculation

Example) MBBL32-100-HN

- Basic weight 0.68
- Additional weight ----- 0.11/50 stroke
- Cylinder stroke ----- 100 stroke
- Locking weight ----- 0.08 (Locking at head end, manual release non-locking type)

 $0.68 + 0.11 \times 100/50 + 0.08 =$ **0.98 kg**

Mounting Brackets/Part No.

Bore size [mm]	32	32 40 50			80	100	
Axial foot Note 1)	MB-L03	MB-L04	MB-L05	MB-L06	MB-L08	MB-L10	
Rod/Head flange	MB-F03	MB-F04	MB-F05	MB-F06	MB-F08	MB-F10	
Single clevis	MB-C03	MB-C04	MB-C05	MB-C06	MB-C08	MB-C10	
Double clevis	MB-D03	MB-D04	MB-D05	MB-D06	MB-D08	MB-D10	

Note 1) Order two foots per cylinder.

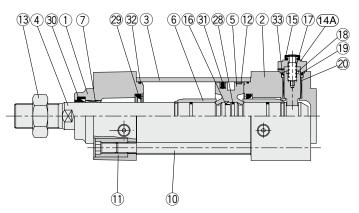

Note 2) Accessories for each mounting bracket are as follows.

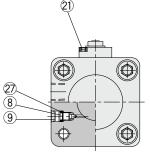

Axial foot, Rod/Head flange, Single clevis/Body mounting bolt; Double clevis/
Body mounting bolt, Clevis pins, Flat washer and Split pins. → Refer to page 14 for details.

Construction

Locking at head end

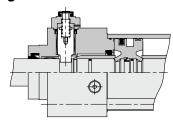

Manual release non-locking type: N

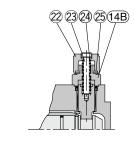

Locking at rod end

Manual release locking type: L

Component Parts

	•		
No.	Description	Material	Note
1	Rod cover	Aluminum alloy	Metallic painted
2	Head cover	Aluminum alloy	Metallic painted
3	Cylinder tube	Aluminum alloy	Hard anodized
4	Piston rod	Carbon steel	Hard chrome plating
5	Piston	Aluminum alloy	Chromated
6	Cushion ring	Aluminum alloy	Anodized
7	Bushing	Bearing alloy	
8	Cushion valve	Steel wire	Trivalent zinc chromated
9	Retaining ring	Steel for spring	ø40 to ø100
10	Tie-rod	Carbon steel	Trivalent zinc chromated
11	Tie-rod nut	Carbon steel	Trivalent zinc chromated
12	Wear ring	Resin	
13	Rod end nut	Carbon steel	Trivalent zinc chromated
14A	Cover A	Aluminum alloy	Painted black
14B	Cover B	Carbon steel	Tufftride
15	Rubber cover	Synthetic rubber	
16	Piston holder	Urethane	

Replacement Parts/Seal Kit (Locking at head or rod end)

Bore size [mm]	Kit no.	Contents			
32	MBB32-PS				
40	MBB40-PS				
50	MBB50-PS	Set of the nos.			
63	MBB63-PS	29, 30, 31, 32, 33			
80	MBB80-PS				
100	MBB100-PS				

- * Seal kits consist of items 29 to 33, and can be ordered by using the seal kit number corresponding to each bore size.
- * Trunnion type should not be disassembled. (Refer to page 64.)
- * Seal kit includes a grease pack (ø32 to 50: 10 g, ø63, 80: 20 g, ø100: 30 g). Order with the following part number when only the grease pack is needed. Grease pack part number: GR-S-010 (10 g), GR-S-020 (20 g)

Com	ponent Parts		
No.	Description	Material	Note
17	Lock spring	Steel wire	
18	Bumper	Urethane	
19	Lock piston	Carbon steel	Hardened, Hard chrome plating

Cautions for Using

1. Use recommended pneumatic circuit.

⚠ Caution

For correct operation of locking or releasing mechanism, use the following pneumatic circuit.

With locking at head end

With locking at rod end

1 Do not use a 3-position solenoid valve.

Avoid using circuit with 3-position solenoid valve (especially closed center, metal seal type).

When pressure is trapped in the port with locking mechanism, end lock is free. When utilizing a 3-position closed center valve, even if the lock is engaged, it may become unlocked due to pressure leakage either across the piston or the valve spool.

② Back pressure is required to release lock.

Before starting operation, supply air to side without locking mechanism as figure above, (or side without locking the piston rod for models with locking at both ends.) Otherwise, lock may not be released. (Refer to "Release of lock".)

③ Release lock when mounting or adjusting the cylinder.

If mounting is done with lock engaged, lock may be damaged.

4 Use with load 50% or less of rated capacity.

If cylinder is used over 50% load capacity, lock may be damaged.

5 Do not use multiple cylinders synchronously.

Avoid using 2 or more end lock cylinders synchronously to perform a single task because one of the cylinders may not allow lock to release.

⑤ Use a speed controller as meter-out.

Meter-in control may not allow lock to release.

Use complete stroke or cylinder at side with lock.

If cylinder piston does not reach end of stroke, lock may not be engaged or released

2. Operating pressure

⚠ Caution

Use pressures 0.15 MPa or more at port with locking mechanism. Otherwise, lock will not be released.

3. Exhaust speed

⚠ Caution

When pressures at port with locking mechanism is decreased to 0.05 MPa or less, it is automatically locked. When exhaust pipe at port with locking mechanism is thin and long or speed controller is distanced from cylinder port, exhaust speed is slow and will require additional time for lock engagement. Clogging the silencer mounted on exhaust port of solenoid valve leads to the same result.

4. Relationship with cushion

⚠ Caution

When cushion valve at side with locking mechanism is fully closed or nearly fully closed, piston rod may not reach the stroke end. Thus lock is not established. And when locking is done with the cushion valve nearly fully closed, adjust the cushion valve since lock may not be released.

5. Release of lock

⚠ Warning

When lock is to be released, supply air pressure to the port without the locking mechanism, this relieves the load from the lock mechanism.

(Refer to recommended pneumatic circuit.) When port without lock mechanism is exhausted and locking mechanism is loaded, the lock may be damaged due to excessive force on lock during release. Also, piston rod will operate immediately.

6. Manual release

⚠ Caution

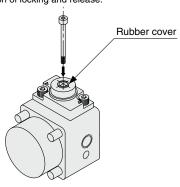

Non-locking type

Insert attached bolt from upper side of rubber cover (no need to remove rubber cover), tighten locking piston and pull bolt, lock will be released. When bolt is released, locking begins to take place. Thread size, required pulling force and stroke are listed below.

Bore size [mm]	Thread size	Pulling force	Stroke [mm]
32	≥ M2.5 x 0.45 x 25 L	4.9 N	2
40, 50, 63	≥ M3 x 0.5 x 30 L	10 N	3
80, 100	≥ M5 x 0.8 x 40 L	24.5 N	3

* Remove bolt under normal operations.

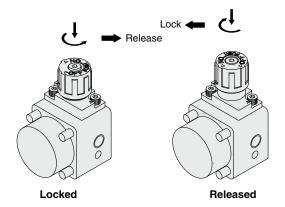

It may cause malfunction of locking and release.

Locking type

Turn 90° counterclockwise while pushing the M/O knob. Lock is released when ▲ on the cap and ▼ OFF mark on the M/O knob correspond. (Lock remains released.)

When locking is desired, turn 90° clockwise while fully pushing the M/O knob and correspond \blacktriangle on the cap and \blacktriangledown ON mark on the M/O knob. Confirm the correct position by click sound "click". Otherwise, lock may not be engaged.

^{*} Models with rubber bumper have different dimensions for auto switch proper mounting positions (A and B). Add the following values to both A and B: 3 mm (ø32 and 40), 4 mm (ø50 and 63), 5 mm (ø80 and 100).

Note) Adjust the auto switch after confirming the operating conditions in the actual setting.

Note 1) For ø32, the values are for the D-P3DW.

[Stainless Steel Mounting Screw]

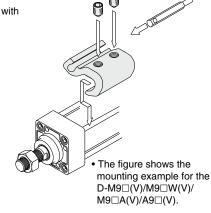

The following stainless steel mounting screw kit (including set screws) is available. Use it in accordance with the operating environment. (Since the auto switch mounting bracket is not included, order it separately.)

BBA1: For D-A5/A6/F5/J5 types

Note 1) Refer to the **WEB catalog** or the Best Pneumatics No. 2 for details on the BBA1.

The above stainless steel screws are used when a cylinder is shipped with the D-F5BA auto switch. When only one auto switch is shipped independently, the BBA1 is attached.

Note 2) When using the D-M9□A(V) or Y7BA, do not use the steel set screws which are included with the auto switch mounting brackets above (BMB5-032, BA7-□□□, BMB4-□□□, BA4-□□□). Order a stainless steel screw kit (BBA1) separately, and use the M4 x 6 L stainless steel set screws included in the BBA1.

^{*} With pre-wired connector is also available for solid state switches. For details, refer to the WEB catalog or the Best Pneumatics No. 2.

^{*} Normally closed (NC = b contact) solid state auto switches (D-F9G/F9H/Y7G/Y7H) are also available. For details, refer to the **WEB catalog** or the Best Pneumatics No. 2.

Prior to Use Auto Switch Connection and Example

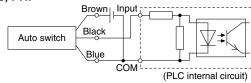

Sink Input Specifications

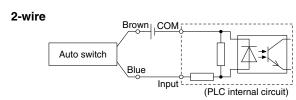

3-wire, NPN Brown Input Auto switch Blue COM (PLC internal circuit)

Auto switch Brown Input COM (PLC internal circuit)

Source Input Specifications

3-wire, PNP

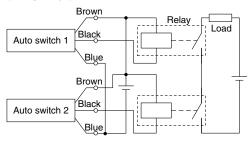

Connect according to the applicable PLC input specifications, as the connection method will vary depending on the PLC input specifications.

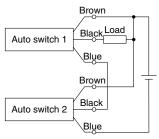

Example of AND (Series) and OR (Parallel) Connection

st When using solid state auto switches, ensure the application is set up so the signals for the first 50 ms are invalid.

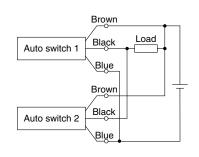

3-wire AND connection for NPN output (Using relays)

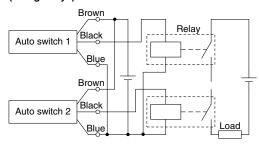

(Performed with auto switches only)

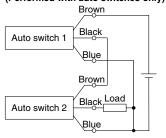

3-wire OR connection for NPN output

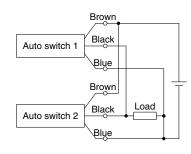

3-wire AND connection for PNP output (Using relays)

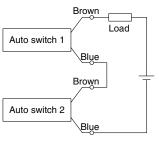

(Performed with auto switches only)

3-wire OR connection for PNP output

2-wire AND connection

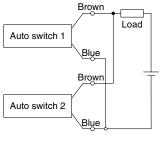

When two auto switches are connected in series, a load may malfunction because the load voltage will decline when in the ON state.

The indicator lights will light up when both of the auto switches are in the ON state. Auto switches with load voltage less than 20 V cannot be used.

Load voltage at ON = Power supply voltage –
Residual voltage x 2 pcs.
= 24 V - 4 V x 2 pcs.
= 16 V

Example: Power supply is 24 VDC Internal voltage drop in auto switch is 4 V.

2-wire OR connection

(Solid state)
When two auto
switches are
connected in parallel,
malfunction may occur
because the load
voltage will increase
when in the OFF state.

Load voltage at OFF = Leakage current x 2 pcs. x Load impedance = 1 mA x 2 pcs. x 3 k Ω = 6 V

Example: Load impedance is 3 k Ω . Leakage current from auto switch is 1 mA.

(Reed)
Because there is no current leakage, the load voltage will not increase when turned OFF.
However, depending on the number of auto switches in the ON state, the indicator lights may sometimes grow dim or not light up, due to the dispersion and reduction of the current flowing to the auto switches.

4 Special Port Location

Compared with the standard type, a cylinder which changes the connection port location of rod/head cover and the location of cushion valve.

Applicable Series

Description	Model	Action	Note
Standard type	MB	Double acting, Single rod	
Standard type	MBW	Double acting, Double rod	
Non-rotating rod	MBK	Double acting, Single rod	
type	MBKW	Double acting, Double rod	

Note) The cover shape is the same as the current product.

How to Order

MB

MBW

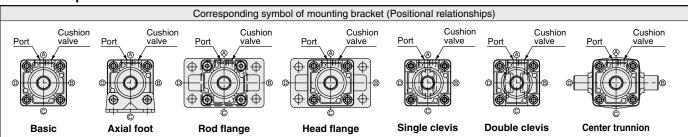

MBK L

* For port location, refer to the following diagrams and show the symbols of A, B, C and D.

Specifications: Same as standard type

Relationship between Port Location and Cushion Valve Location

- 1. Symbol of position for port and cushion valve has to be looked from the rod side, as figures above. (In the case of standard cylinders, port must be positioned in the upper side.) Define the upper side to be A, and then B, C, and D in a clockwise order.
- 2. Model of combination between port and cushion valve is applicable only when the position of a port and a cushion valve on the rod cover and the head cover will be changed to the same position against the support bracket, as a rule.
- 3. XC3AA is not available in terms of the position between port and cushion valve, since it is available in the standard products.

5 With Heavy Duty Scraper

Symbol -XC4

It is suitable for using cylinders under the environment, where there are much dusts in a surrounding area by using a heavy duty scraper on the wiper ring, or using cylinders under earth and sand exposed to the die-casted equipment, construction machinery, or industrial vehicles.

Applicable Series

Description	Model	Action	Note

Adjustable stroke cylinder/Adjustable extension type

⚠ Warning Precautions

- When the cylinder is operating, if something gets caught between the stopper bracket for adjusting the stroke and the cylinder body, it could cause bodily injury or damage the peripheral equipment. Therefore, take preventive measures as necessary, such as installing a protective cover.
- 2. To adjust the stroke, make sure to secure the wrench flats of the stopper bracket by a wrench, etc. before loosening the lock nut. If the lock nut is loosened without securing the stopper bracket, be aware that the area that joins the load to the piston rod or the area in which the piston rod is joined with the load side and the stopper bracket side could loosen first. It may cause an accident or malfunction.

Functional description of dual stroke cylinder

- Initial state
 (0 stroke position)
- Stroke B-A

 B

 C

 A

 Stroke B-A

 B

 B

 A
- 2) 1st stage (Stroke A operation) When the air pressure is supplied from the a port, the rod operates the stroke A.
- 3) 2nd stage (Stroke B-A operation) Following the 1st stage, when the air pressure is supplied from the port, the rod operates the stroke B-A.
- 4) Cylinder retraction When the air pressure is supplied from the **3** port, the rod retracts completely.

Stroke A or Stroke B operation can be made individually.

Stroke A operation

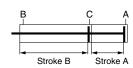

- Initial state
 (0 stroke position)
- Stroke A B C
- 2) Operation
 When the air pressure
 is supplied from
 the port, the rod
 operates the stroke A.

Stroke B operation

- Initial state
 (0 stroke position)
- Stroke B B A
- 2) Operation
 When the air pressure
 is supplied from
 the port, the rod
 operates the stroke B.

Double output is possible.

- Initial state
 (0 stroke position)
- W Stroke A
- 2) Double output
 When the air pressure
 is supplied to the and ports at the
 same time, the double
 output can be obtained
 in the stroke A range.

∆ Caution

Precautions

- 1. Do not supply air until the cylinder is fixed with the attached bolt.
- If air is supplied without securing the cylinder, the cylinder could lurch, posing the risk of bodily injury or damage to the peripheral equipment.

With End Lock

13 Tandem Cylinder

Symbol -XC12

This is a cylinder produced with two air cylinders in line allowing double the output force.

Applicable Series

Description	Model	Action	Note

Specifications

Max. manufacturable stroke [mm]					
Specifications other than above	Same as standard type				

How to Order

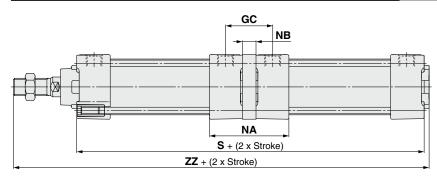

Function

When air pressure is supplied to ports **3** and **3**, the output force is doubled in the retract stroke.

When air pressure is supplied to ports and , the output force is doubled in the out stroke.

25 Cylinder with Heat Resistant Reed Auto Switch (-10 to 120°C)

-X1184

Applicable Series

Description Mo		Model	Action	Note
	Standard type	MB	Double acting, Single rod	

How to Order

Cylinder with heat resistant reed auto switch

* Refer to the **WEB catalog** or the Best Pneumatics No. 2 for details about the D-B3 auto switch and the Specific Product Precautions.

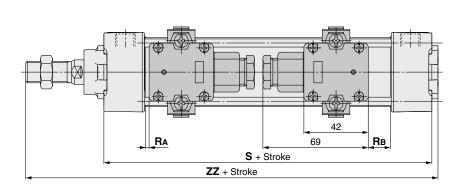

Specifications

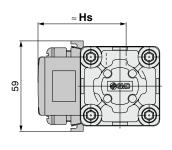

Ambient temperature range	−10°C to 120°C	
Bore size	40, 50, 63, 80, 100	
Seal material	Fluororubber	
Grease	Heat resistant grease	

⚠Warning Precautions

Be aware that smoking cigarettes etc. after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

Series MB Specific Product Precautions

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For Actuator and Auto Switch Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on the SMC website, http://www.smcworld.com

Adjustment

⚠ Warning

1. Do not open the cushion valve beyond the stopper.

Crimping (Ø32) or a retaining ring (Ø40 to Ø100) is provided to prevent the accidental removal of the cushion valve. Do not open the valve beyond the mechanism. If air is supplied, the cushion valve may shoot out from the cover.

Bore size [mm]	Cushion valve width across flats [mm]	Hexagon wrench	
32, 40	2.5	JIS 4648 Hexagonal wrench key 2.5	
50, 63	3	JIS 4648 Hexagonal wrench key 3	
80, 100, 125	4	JIS 4648 Hexagonal wrench key 4	

2. Use the air cushion at the end of cylinder stroke.

Select the cylinder with bumper if the cushion valve is to be fully opened. Otherwise, tie-rods or piston assembly may be damaged.

3. When replacing mounting brackets, use a hexagon wrench.

Bore size [mm] Bo		Bolt	Width across flats [mm]	Tightening torque [N·m]
32, 40		MB-32-48-C1247	4	5.1
50	0, 63 MB-50-48-C1249		5	11
80,	Foot	MB-80-48AC1251		25
100	Others	MB-80-48BC1251	О	25
125 Foot Others		CE00008	8 30.1	
		CE00032	0	30.1

4. When replacing mounting brackets, tie-rod nuts on the cylinder body become loosened.

After retightening the tie-rod nuts with the proper tightening torque (Refer to Adjustment 3.), mount a mounting bracket.

5. Do not disassemble the trunnion type cylinder because the mounting precision is required.

It is difficult to align the axial center of the trunnion with the axial center of the cylinder. Thus, if this type of cylinder is disassembled and reassembled, the required dimensional accuracy cannot be attained, which may lead to malfunctions.

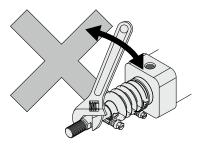

With Rod Boot

Handling

⚠ Caution

 Do not turn the piston rod with the rod boot kept locked.

When turning the piston rod, loosen the band once and do not twist the rod boot.

2. Set the breathing hole in the rod boot downward or in the direction that prevents entry of dust or water content.

⚠ Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of "Caution," "Warning" or "Danger." They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

Caution: Caution indicates a hazard with a low level of risk which, If not avoided, could result in minor or moderate injury.

Warning: Warning indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

⚠ Danger: Danger if not avoided, will result in death or serious injury. **Danger** indicates a hazard with a high level of risk which, *1) ISO 4414: Pneumatic fluid power - General rules relating to systems.

ISO 4413: Hydraulic fluid power – General rules relating to systems. IEC 60204-1: Safety of machinery - Electrical equipment of machines.

(Part 1: General requirements)

ISO 10218-1: Manipulating industrial robots - Safety.

⚠Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

- 3. Do not service or attempt to remove product and machinery/ equipment until safety is confirmed.
 - 1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
 - 2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
 - 3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.
- 4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.
 - 1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
 - 2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalog.
 - 3. An application which could have negative effects on people, property, or animals requiring special safety analysis.
 - 4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

⚠ Caution

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.

If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary. If anything is unclear, contact your nearest sales branch.

Limited warranty and Disclaimer/ **Compliance Requirements**

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements".

Read and accept them before using the product.

Limited warranty and Disclaimer

- 1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.*2)
- Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
- 2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
- 3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.
 - 2) Vacuum pads are excluded from this 1 year warranty.

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.

Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

Compliance Requirements

- 1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
- 2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

⚠ Caution

SMC products are not intended for use as instruments for legal metrology.

Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

Revision history

RW

Edition B * Standard type, Double rod

* Added Made to Order: Heat resistant cylinder (-XB6), With heavy duty scraper (-XC4), Adjustable stroke cylinder (-XC8, 9) and Dual stroke cylinder (-XC10, 11), etc.

Number of pages increased from 24 to 44.

Changed standard strokes tables.

* Added current models, Non-rotating rod type (MBK, MBKW), With end lock (MBB) and Low friction type (MB□Q).

* Number of pages increased from 44 to 64.

SZ

Edition D * Non-rotating rod type: Changed to the MBK-Z series.

* Non-rotating rod type: Changed to the MBKW-Z series.

Edition C * Added ø125 to standard type.

Safety Instructions Be sure to read the "Handling Precautions for SMC Products" (M-E03-3) and "Operation Manual" before use.
