Air Cylinder

Ø32, Ø40, Ø50, Ø63, Ø80, Ø100, Ø125

CAT.ES20-234B

Part numbers with rod end bracket and/or pivot bracket available

Not necessary to order a bracket for the applicable cylinder separately Note) Mounting bracket is shipped together with the product, but not assembled.

Example) MDB1 D 40-100Z- N V -M9BW

■ Mounting style

Pivot	bracket
Nil	No bracket
N	Pivot bracket is shipped together with the product, but not assembled.

* Applicable to only D (Double clevis) mounting

Rod end bracket							
Nil	No bracket						
٧	Single knuckle joint						
W	Double knuckle joint						

Various mounting bracket options

• Suitable mounting brackets can be selected for the installation condition.

· Improved amount of mounting freedom

B: Basic

G: Head flange

L: Axial foot

N: Double clevis pivot bracket

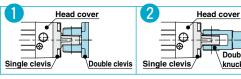

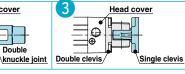

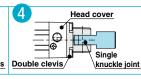

Bracket Combinations

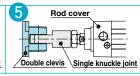

Bracket combination availableCircled numbers are those shown in figures below.

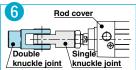

Diagnot Combination	avanabio	Choice hambers are those shown in figures below				
Bracket for Workpiece for cylinder	Single clevis	Double clevis	Single knuckle joint	Double knuckle joint	Clevis pivot bracket	
Single clevis	_	0	_	2	_	
Double clevis	3	_	4	_	9	
Single knuckle joint	_	5	_	6	_	
Double knuckle joint	7	_	8	_	10	

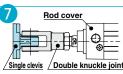

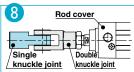

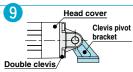

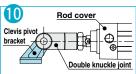

Features

Lightweight

Reduced weight by changing the shape of the rod cover and head cover.

Bore size [mm]	New MB1	Reduction rate [%]	Current model
32	0.8	11	0.9
40	1.0	9	1.1
50	1.7	11	1.9
63	2.1	9	2.3
80	3.6	10	4.0
100	4.9	8	5.3
125	7.6	0	7.6

Mounting dimensions are the same as the current product.

* At 100 stroke

Applicable speed/load

- Piston speed: Max. **1000** mm/s (ø32 to ø125) Load yield: See table below.

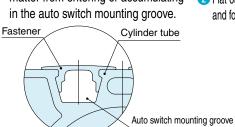

Bore size [mm]	Maximum load mass
32	80
40	140
50	190
63	310
80	500
100	800
125	1250

* Speed: 200 mm/s

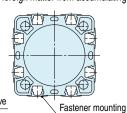

Dust-prevention from fastener (Option)

 Fastener avoids dust and foreign matter from entering or accumulating in the auto switch mounting groove.

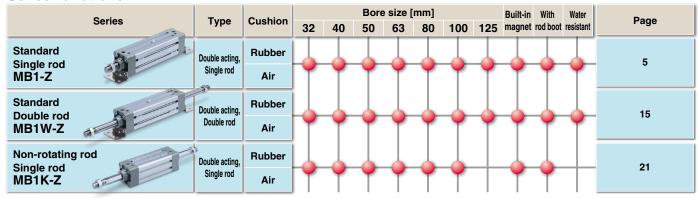

Plat outer circumference prevents dust and foreign matter from accumulating

Fastener

Square Tube Type Air Cylinder: Standard Type **Double Acting, Single Rod**

Series MB1

Ø32, Ø40, Ø50, Ø63, Ø80, Ø100, Ø125

How to Order

to enter the symbol for the auto switch. (Example) MDB1B40-100Z

length is longer than the cylinder with air cushion as follows: Ø32, Ø40: +6 mm, Ø50, Ø63: +8 mm, ø80, ø100: +10 mm, ø125: +12 mm.

- * Only for D mounting style.
- * Pivot bracket is shipped together with the product.
- For details, refer to page 13.

Applicable Auto Switches/Refer to the WEB catalog or the Best Pneumatics No. 2 for further information on auto switches.

Calculation

Example) MB1B32-100Z (Basic, ø32, 100 stroke)

- Basic weight 0.47 (Basic, ø32)
- Additional weight 0.16/50 stroke
- Cylinder stroke 100 stroke

Note 2) Accessories for each mounting bracket are as follows. Axial foot, Rod/Head flange, Single clevis/Body mounting bolt; Double clevis/Body mounting bolt, Clevis pin, Split pins and Flat washers. \rightarrow Refer to page 14 for details.

 $^{0.47 + 0.16 \}times 100/50 =$ **0.79 kg**

Square Tube Type Air Cylinder: Standard Type Double Acting, Single Rod Series MB1

Kinetic Energy Absorbable by Cushion Mechanism

Bore size [mm]	Effective cu:	Ū	Kinetic energy absorbable
32	18	3.8	2.2
40	18	3.8	3.4
50	21	.3	5.9
63	21	.3	11
80	30	.3	20
100	29	.3	29
125	Rod side	31.4	43
120	Head side	29.4	43

With Air Cushion

At the stroke end, when stopping a large amount of kinetic energy generated by a large load and high speed operation, compression of air is used to absorb the impact without transmitting vibration to the surroundings. The purpose of an air cushion is not to reduce the speed of a piston as it nears the stroke end. The kinetic energy of load can be found using the following formula.

$$\mathbf{E}\mathbf{k} = \frac{\mathbf{M}}{2} \upsilon^2$$

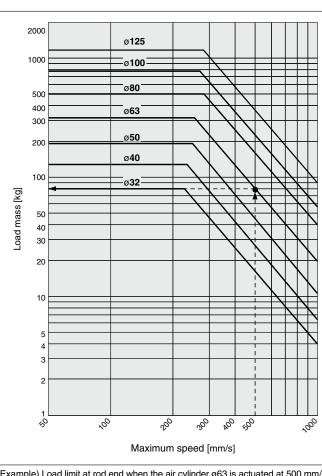

Ek: Kinetic energy [J] M: Mass of load [kg]

υ: Piston speed [m/s]

If the kinetic energy obtained is no greater than the absorbable kinetic energy shown in the table on the left, the life of the cushion seal will be 10 million cycles or more.

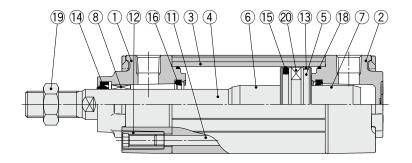

Allowable Kinetic Energy

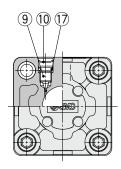

Example) Load limit at rod end when the air cylinder ø63 is actuated at 500 mm/s. Extend upward from 500 mm/s on the horizontal axis of the graph to the intersection point with the line for a tube bore size of 63 mm, and then extend leftward from this point to find the load of 80 kg.

^{*} Seal kits consist of items (4), (5), (6), (8), and can be ordered by using the seal kit number corresponding to each bore size.

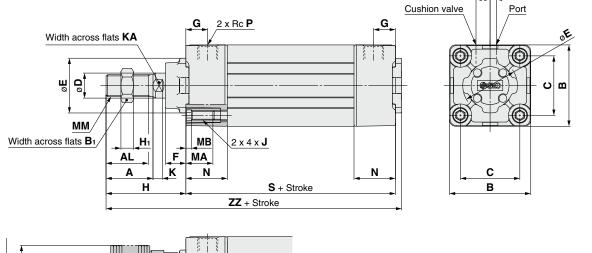

^{*} The seal kit includes a grease pack (10 g for ø32 to ø50, 20 g for ø63 and ø80, 30 g for ø100).

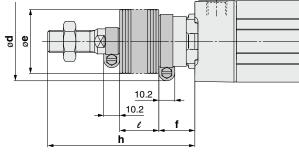

Order with the following part number when only the grease pack is needed.

Grease pack part number: GR-S-010 (10 g), GR-S-020 (20 g)

Standard

Basic: (B)

* Since the bumpers are attached to the both sides of the piston for rubber bumper type, the overall length is longer than the cylinder with air cushion as follows: ø32, ø40: +6 mm, ø50, ø63: +8 mm, ø80, ø100: +10 mm, ø125: +12 mm.

- *1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance. Please contact SMC regarding water resistant types with the above model numbers.
- *2 1 m type lead wire is only applicable to the D-A93.
- * Lead wire length symbols: 0.5 mNil (Example) M9NW

1 m ······ M (Example) M9NWM

3 m L (Example) M9NWL

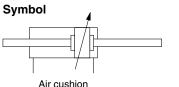

- 5 m ······ Z (Example) M9NWZ
- * Solid state auto switches marked with "O" are produced upon receipt of order.
- * Since there are other applicable auto switches than listed above, refer to page 26 for details.
- * For details about auto switches with pre-wired connector, refer to the WEB catalog or the Best Pneumatics No. 2.
- * Auto switches are shipped together, (but not assembled).

- *1 Air cushion only
- *2 Except ø125
- *3 The cover shape is the same as the current product.
- *4 ø125 only

For special port location (-XC3), the mounting bracket and port location can be determined using the standard product corresponding to the operating conditions. Also, this is only applicable to -XC3BB, -XC3CC and -XC3DD with trunnion bracket.

Refer to pages 25 and 26 for cylinders with auto switches.

- Auto switch proper mounting position (detection at stroke end) and its mounting height
- Minimum stroke for auto switch mounting
- Operating range
- Auto switch mounting brackets/Part no.

Specifications

Bore size [mm]	32	40	50	63	80	100	125		
Action			Double	acting, Do	uble rod		,		
Fluid				Air					
Proof pressure				1.5 MPa					
Maximum operating pressure				1.0 MPa					
Minimum operating pressure	0.05 MPa								
Ambient and fluid temperature	Without auto switch: -10 to 70°C (No freezing) With auto switch: -10 to 60°C								
Lubrication			Not red	quired (No	n-lube)				
Piston speed			50 to 10	00 mm/s			50 to 700 mm/s		
Stroke length tolerance			Up to 250	: +1.0, 251 to	1000: +1.4		•		
Cushion Note)	Air cushion or Rubber bumper								
Port size (Rc, NPT, G)	1/8 1/4 3/8 1/2								
Mounting	Basic, Axial foot, Rod flange								

Note) Kinetic energy absorbable by the cushion mechanism is identical to double acting, single rod.

Standard Strokes

			[mm]
Bore	Standard stroke		Max. manufacturable
size	Stroke range ①	Stroke range ②	stroke
32	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500		
40	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500		Up to 1800
50	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600		
63	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600	Up to 1000	
80	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800		
100	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800		
125	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800, 1000	00	Up to 2000

- Note 1) Intermediate strokes are available. (No spacer is used.)
- Note 2) Applicable strokes should be confirmed according to the usage. For details, refer to "Air Cylinders Model Selection" on front matter pages of the Best Pneumatics No. 2 or the WEB catalog. In addition, the products that exceed the stroke range ① might not be able to fulfill the specifications due to the deflection etc
- Note 3) Please consult with SMC for manufacturability and the part numbers when exceeding the stroke range ②.

How to Order

Built-in Magnet Cylinder Model

If a built-in magnet cylinder without an auto switch is required, there is no need to enter the symbol for the auto switch. (Example) MDB1B40-100Z

ſ	Nil	No bracket
	N	Pivot bracket

- * Only for D mounting style
- * Pivot bracket is shipped together with the product.
- * Refer to page 13 for pivot bracket.
- A knuckle joint pin is not provided with the single knuckle joint.
- Rod end bracket is shipped together with the product.
- The screw-in amount of the piston rod end cannot be adjusted when a clevis bracket, trunnion bracket and knuckle joint are used together.

Applicable Auto Switches/Refer to the WEB catalog or the Best Pneumatics No. 2 for further information on auto switches.

- *1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance. Please contact SMC regarding water resistant types with the above model numbers.
- *2 1 m type lead wire is only applicable to the D-A93.
- * Lead wire length symbols: 0.5 mNil (Example) M9NW

1 m ······ M (Example) M9NWM

3 m L (Example) M9NWL 5 m Z (Example) M9NWZ

- * Solid state auto switches marked with "O" are produced upon receipt of order.
- * Since there are other applicable auto switches than listed above, refer to page 26 for details.
- * For details about auto switches with pre-wired connector, refer to the WEB catalog or the Best Pneumatics No. 2.
- * Auto switches are shipped together, (but not assembled).

Symbol

Made to Order (For details, refer to pages 29 to 43.)

Symbol	Specifications					
-XA□	Change of rod end shape					
-XC3	Special port location*					
-XC6	Piston rod and rod end nut made of stainless steel					
-XC7	Tie-rod, cushion valve, tie-rod nut, etc. made of stainless steel					
-XC8	Adjustable stroke cylinder/Adjustable extension type					
-XC9	Adjustable stroke cylinder/Adjustable retraction type					
-XC10	Dual stroke cylinder/Double rod type					
-XC27	Double clevis and double knuckle joint pins made of stainless steel					
-XC30	Rod trunnion					
-X846	Fastener strips mounted on switch mounting grooves					

^{*} The cover shape is the same as the current product.

For special port location (-XC3), the mounting bracket and port location can be determined using the standard product corresponding to the operating conditions. Also, this is only applicable to -XC3BB, -XC3CC and -XC3DD with trunnion bracket.

80	MBK80Z-PS	
100	MBK100Z-PS	

^{*} Seal kits consist of items (4), (5), (6), (8), and can be ordered by using the seal kit number corresponding to each bore size.

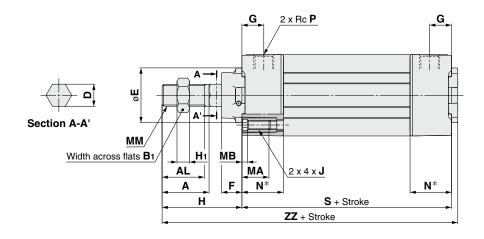

Order with the following part number when only the grease pack is needed. Grease pack part number: GR-S-010 (10 g), GR-S-020 (20 g)

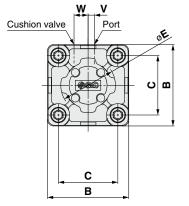

^{*} The seal kit includes a grease pack (10 g for ø32 to ø50, 20 g for ø63 and ø80, 30 g for ø100).

^{*} Model without air cushion is designed to include rubber bumpers. Since the bumpers are attached to the both sides of the piston, the overall length is longer than the cylinder with air cushion as follows: ø32, ø40: +6 mm, ø50, ø63: +8 mm, ø80, ø100: +10 mm

 \ast Values which include hysteresis are for guideline purposes only, they are not a guarantee (assuming approximately $\pm30\%$ dispersion) and may change substantially depending on the ambient environment.

Other than the applicable auto switches listed in "How to Order", the following auto switches are mountable. Refer to the WEB catalog or the Best Pneumatics No.2 for the detailed specifications.

Туре	Model	Electrical entry	Features
	D-Y69A, Y69B, Y7PV	Grommet (Perpendicular)	_
Solid state	D-Y7NWV, Y7PWV, Y7BWV	Grommet (Perpendicular)	Diagnostic indication (2-color indication)
	D-Y59A, Y59B, Y7P		_
	D-Y7NW, Y7PW, Y7BW	Grommet (In-line)	Diagnostic indication (2-color indication)
	D-Y7BA		Water resistant (2-color indication)
Reed	D-Z73, Z76	Grommet (In-line)	_
	D-Z80	Grommet (III-IIIIe)	Without indicator light

- * With pre-wired connector is also available for solid state auto switches. For details, refer to the WEB catalog or the Best Pneumatics No. 2.
- * Normally closed (NC = b contact) solid state auto switches (D-F9G/F9H/Y7G/Y7H) are also available. For details, refer to the **WEB catalog** or the Best Pneumatics No. 2.

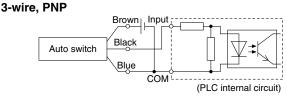

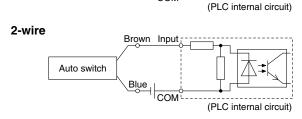

Prior to Use Auto Switch Connection and Example

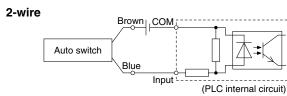

Sink Input Specifications

Source Input Specifications

3-wire, NPN Brown Input Black Blue COM

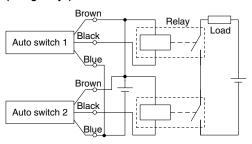

Connect according to the applicable PLC input specifications, as the connection method will vary depending on the PLC input specifications.

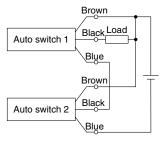

Example of AND (Series) and OR (Parallel) Connection

 $* \ When \ using \ solid \ state \ auto \ switches, ensure \ the \ application \ is \ set \ up \ so \ the \ signals \ for \ the \ first \ 50 \ ms \ are \ invalid.$

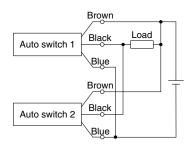

3-wire AND connection for NPN output (Using relays)

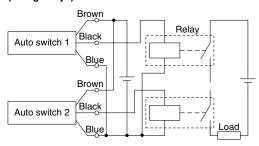

(Performed with auto switches only)

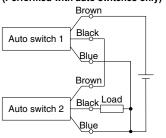

3-wire OR connection for NPN output

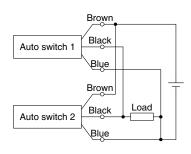

3-wire AND connection for PNP output (Using relays)

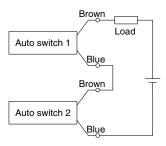

(Performed with auto switches only)

3-wire OR connection for PNP output

2-wire AND connection

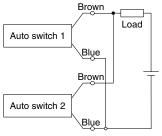

When two auto switches are connected in series, a load may malfunction because the load voltage will decline when in the ON state.

The indicator lights will light up when both of the auto switches are in the ON state. Auto switches with load voltage less than 20 V cannot be used.

Load voltage at ON = Power supply voltage –
Residual voltage x 2 pcs.
= 24 V - 4 V x 2 pcs.
= 16 V

Example: Power supply is 24 VDC Internal voltage drop in auto switch is 4 V.

2-wire OR connection

(Solid state)
When two auto
switches are
connected in parallel,
malfunction may occur
because the load
voltage will increase
when in the OFF state.

Load voltage at OFF = Leakage current x 2 pcs. x

Load impedance

Load impedance = 1 mA x 2 pcs. x 3 k Ω = 6 V

Example: Load impedance is 3 k Ω . Leakage current from auto switch is 1 mA.

(Reed) Because there is no current leakage, the load voltage will not increase when turned OFF. However, depending on the number of auto switches in the ON state, the indicator lights may sometimes grow dim or not light up, due to the dispersion and reduction of the current flowing to the auto switches.

Series MB1

Simple Specials/Made to Order Please contact SMC for detailed specifications, delivery and prices.

The following special specifications can be ordered as a simplified Made-to-Order.

There is a specification sheet available on paper and CD-ROM. Please contact your SMC sales representatives if necessary.

Simple Specials/Made to Order Series MB1

Series MB1 Simple Specials These changes are dealt with Simple Specials System

For details, refer to the Simple Specials System in the WEB catalog. http://www.smcworld.com

Symbol

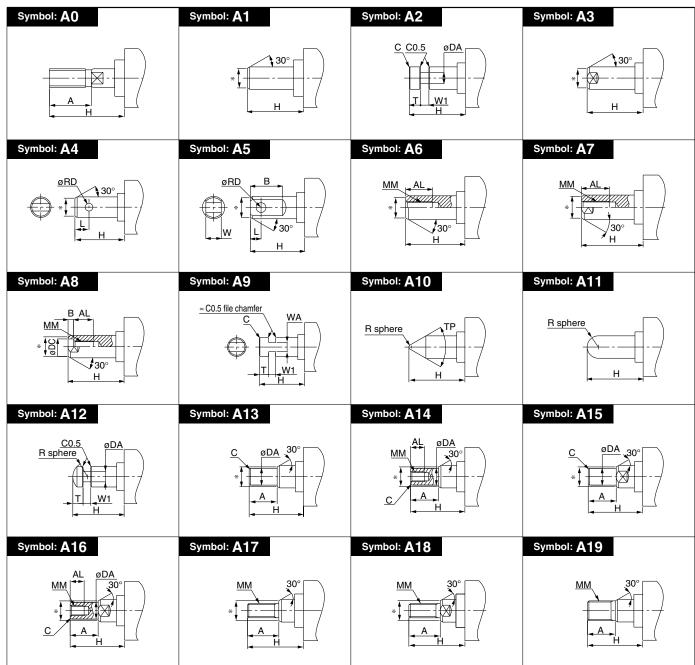

-XA0 to XA30

1 Change of Rod End Shape

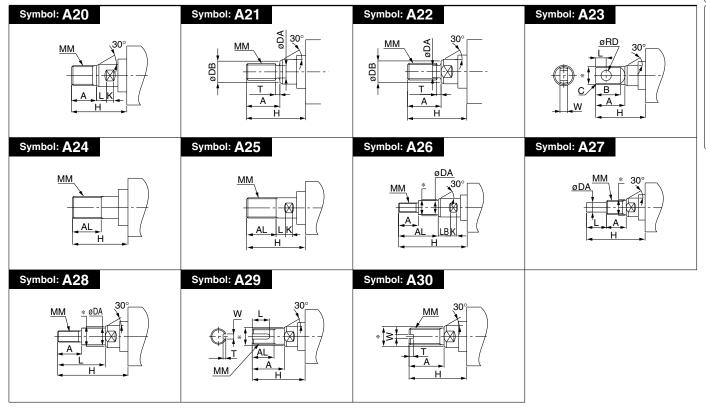

Series		Action	Symbol for change of rod end shape	Note
Ctandard type	MB1	Double acting, Single rod	XA0 to 30	Except pivot bracket and rod end bracket
Standard type	MB1W	Double acting, Double rod	XA0 to 30	Except pivot bracket and rod end bracket
Non-rotating rod type	MB1K	Double acting, Single rod	XA0, 1, 6, 10, 11, 13, 14, 17, 19, 21	

Precautions

- SMC will make appropriate arrangements if no dimension, tolerance, or finish instructions are given in the diagram.
- Standard dimensions marked with "*" will be as follows to the rod diameter (D). Enter any special dimension you desire.
- $D \le 6 \to D-1$ mm $6 < D \le 25 \to D-2$ mm $D > 25 \to D-4$ mm 3. In the case of double rod type and single acting retraction type, enter the dimensions when the rod is retracted.

Simple Specials Series MB1

Series MB1 Made to Order

Please contact SMC for detailed dimensions, specifications and lead times.

1 Oversized Rod Cylinder

Symbol -XB5

A cylinder that has been made stronger through the use of a piston rod with a larger diameter. It is used for long stroke applications that pose the risk of bending or buckling of the piston rod. (Please contact SMC if a lateral load must be applied to it.)

Applicable Series

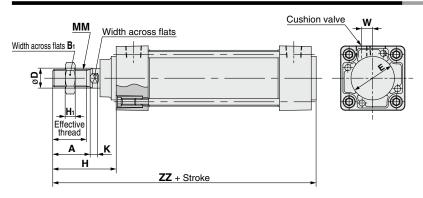

Description	Model	Action	Note
Standard type	MB1	Double acting, Single rod	

Note) The cover shape is the same as the current product.

How to Order

Dimensions (Dimensions other than below are the same as standard type.)

											[mm]

Symbol

-XB6

2 Heat Resistant Cylinder (-10 to 150°C)

Air cylinder which changed the seal material and grease, so that it could be used even at higher temperature up to 150 from -10°C.

Applicable Series

Description	Model	Action	Note
Standard type	MB1	Double acting, Single rod	Except ø125, with rubber bumper and with auto switch
	MB1W	Double acting, Double rod	Except ø125, with rubber bumper and with auto switch

Note 1) Operate without lubrication from a pneumatic system lubricator.

Note 2) Please contact SMC for details on the maintenance intervals for this cylinder, which differ from those of the standard cylinder.

Note 3) In principle, it is impossible to make built-in magnet type and the one with auto switch. But, as for the one with auto switch, and the heat resistant cylinder with heat resistant auto switch, please contact SMC.

Note 4) Piston speed is ranged from 50 to 500 mm/s.

Specifications

Ambient temperature range	-10°C to 150°C	
Seal material	Fluororubber	
Grease	Heat resistant grease	
Specifications other than above and external dimensions	Same as standard type	

.Marning

Precautions

Be aware that smoking cigarettes etc. after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

How to Order

3 Special Port Location

Symbol -XC3

Compared with the standard type, a cylinder which changes the connection port location of rod/head cover and the location of cushion valve.

Applicable Series

Description Model		Action	Note
Ctondovd tune	MB1	Double acting, Single rod	
Standard type	MB1W	Double acting, Double rod	
Non-rotating rod type	MB1K	Double acting, Single rod	

Note) The cover shape is the same as the current product.

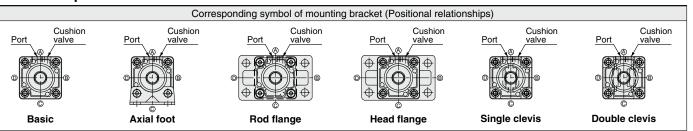

How to Order

* For port location, refer to the following diagrams and show the symbols of A, B, C and D.

Specifications: Same as standard type

Relationship between Port Location and Cushion Valve Location

- 1. Symbol of position for port and cushion valve has to be looked from the rod side, as figures above. (In the case of standard cylinders, port must be positioned in the upper side.) Define the upper side to be A, and then B, C, and D in a clockwise order.
- 2. Model of combination between port and cushion valve is applicable only when the position of a port and a cushion valve on the rod cover and the head cover will be changed to the same position against the support bracket, as a rule.
- 3. XC3AA is not available in terms of the position between port and cushion valve, since it is available in the standard products.

4 With Heavy Duty Scraper

Symbol -XC4

It is suitable for using cylinders under the environment, where there are much dusts in a surrounding area by using a heavy duty scraper on the wiper ring, or using cylinders under earth and sand exposed to the die-casted equipment, construction machinery, or industrial vehicles.

Applicable Series

Description Mod		Model	Action	Note
	Standard type	MB1	Double acting, Single rod	Except ø125
		MB1W	Double acting, Double rod	Except ø125

How to Order

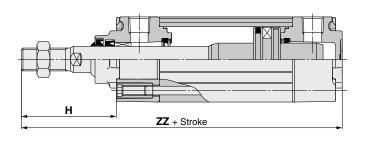

Specifications: Same as standard type

⚠ Caution

Do not replace heavy duty scrapers.

 Since heavy duty scrapers are press-fit, do not replace the cover only, but rather the entire rod cover assembly.

Construction (Dimensions are the same as standard.)

		[mm]
Bore size	Н	ZZ
32	47	135
40	58	146
50	67	165
63	67	165
80	81	199
100	81	199

5 Heat Resistant Cylinder (-10 to 110°C)

Symbol -XC5

Cylinder which changed the seal material for heat resistance (up to 110°C) in order to use under the severe ambient temperature condition which exceeds the standard specifications of -10 to 70°C.

Applicable Series

Description	Model	Action	Note
Standard type	MB1	Double acting, Single rod	Except ø125, with rubber bumper and with auto switch
	MB1W	Double acting, Double rod	Except ø125, with rubber bumper and with auto switch

Specifications

Ambient temperature range	–10°C to 110°C
Seal material	Fluororubber
With auto switch	Unavailable Note 2)
Specifications other than above and external dimensions	Same as standard type

Note 1) Please contact SMC for details on the maintenance intervals for this cylinder, which differ from those of the standard cylinder.

Note 2) Manufacturing built-in magnet type and the one with auto switch is impossible.

Note 3) Rod boot material is heat resistant tarpaulin.

How to Order

Standard model no. Heat resistant cylinder

6 Piston Rod and Rod End Nut Made of Stainless Steel

Symbol

Suitable for the cases it is likely to generate rust by being immersed in the water and corrosion.

Applicable Series

Description	Model	Action	Note
Standard type	MB1	Double acting, Single rod	Only ø125
Non-rotating rod type	MB1K	Double acting, Single rod	

Specifications

Parts changed to stainless steel	Piston rod, Rod end nut	
Specifications other than above and external dimensions	Same as standard type	

How to Order

Piston rod and rod end nut made of stainless steel

Tie-rod, Cushion Valve, Tie-rod Nut, etc. Made of Stainless Steel

Symbol

-XC7

When using in locations where the rust generation or corrosion likelihood exists, the standard parts material have been partly changed to the stainless steel.

Applicable Series

Description Model		Action	Note
Chandoud tune	MB1	Double acting, Single rod	Except ø125
Standard type	MB1W	Double acting, Double rod	Except ø125
Non-rotating rod type	MB1K	Double acting, Single rod	

Specifications

Component parts changed to	Tie-rod, Tie-rod nut, Mounting bracket nut,
stainless steel	Cushion valve, Rod end nut
Specifications other than above	Same as standard type
Dimensions	Same as standard type

How to Order

Standard model no.

Tie-rod, cushion valve, tie-rod nut, etc made of stainless steel

Adjustable Stroke Cylinder/Adjustable Extension Type

Symbol -XC8

It adjusts the extending stroke by the stroke adjustable mechanism equipped in the head side. (After the stroke is adjusted, with cushion on both sides is altered to single-sided, with cushion.)

Applicable Series

Description	Model	Action	Note
Standard type	MB1	Double acting, Single rod	Except ø125, with rubber bumper and with auto switch
Non-rotating rod type	MB1K	Double acting	Except head flange and clevis types

Specifications

Stroke adjustment symbol	A	В
Stroke adjustment range [mm]	0 to 25	0 to 50
Specifications other than above	Same as st	andard type

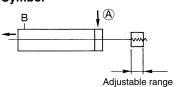

How to Order

MB1 Mounting style Bore size – Stroke Suffix Stroke adjustment symbol

* Except head flange and clevis types

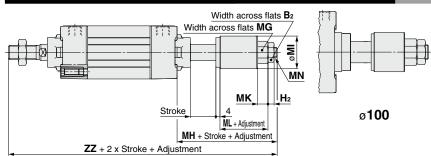

Adjustable stroke cylinder/Adjustable extension type

Symbol

⚠Warning Precautions

- 1. When the cylinder is operating, if something gets caught between the stopper bracket for adjusting the stroke and the cylinder body, it could cause bodily injury or damage the peripheral equipment. Therefore, take preventive measures as necessary, such as installing a protective cover.
- 2. To adjust the stroke, make sure to secure the wrench flats of the stopper bracket by a wrench, etc. before loosening the lock nut. If the lock nut is loosened without securing the stopper bracket, be aware that the area that joins the load to the piston rod or the area in which the piston rod is joined with the load side and the stopper bracket side could loosen first. It may cause an accident or malfunction.

Symbol

Adjustable stroke cylinder/Adjustable retraction type

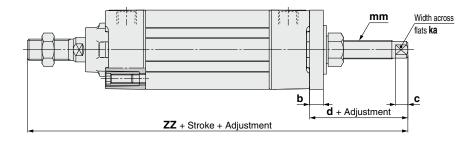

(After the stroke is adjusted, with cushion on both sides is altered to single-sided, with cushion.)

⚠ Caution

Precautions

- 1. When air is supplied to the cylinder, if the stroke adjustment bolt is loosened in excess of the allowable stroke adjustment amount, be aware that the stroke adjustment bolt could fly out or air could be discharged, which could injure personnel or damage the peripheral equipment.
- Adjust the stroke when the cylinder is not pressurized.If it is adjusted in the pressurized state, the seal of the adjustment section could become deformed, leading to air leakage.

Functional description of dual stroke cylinder

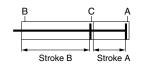

- Initial state
 (0 stroke position)
- Stroke B-A

 B

 C

 Stroke B-A
- 2) 1st stage (Stroke A operation) When the air pressure is supplied from the a port, the rod operates the stroke A.
- 3) 2nd stage (Stroke B-A operation) Following the 1st stage, when the air pressure is supplied from the port, the rod operates the stroke B-A.
- 4) Cylinder retraction When the air pressure is supplied from the port, the rod retracts completely.

Stroke A or Stroke B operation can be made individually.

Stroke A operation

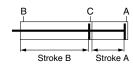

- Initial state
 (0 stroke position)
- Stroke A B C
- 2) Operation
 When the air pressure
 is supplied from
 the A port, the rod
 operates the stroke A.

Stroke B operation

- Initial state
 (0 stroke position)
- Stroke B B A
- 2) Operation
 When the air pressure
 is supplied from
 the port, the rod
 operates the stroke B.

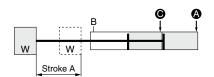

Double output is possible.

Stroke B

Stroke A

Initial state
 (0 stroke position)

2) Double output
When the air pressure
is supplied to the and ports at the
same time, the double
output can be obtained
in the stroke A range.

∆ Caution

Precautions

- 1. Do not supply air until the cylinder is fixed with the attached bolt.
- 2. If air is supplied without securing the cylinder, the cylinder could lurch, posing the risk of bodily injury or damage to the peripheral equipment.

12 Tandem Cylinder

Standard model no.

Symbol -XC12

This is a cylinder produced with two air cylinders in line allowing double the output force.

Tandem cylinder

- XC12

18 With Coil Scraper

Symbol -XC35

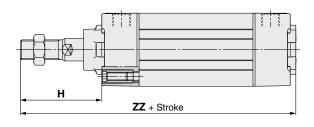

It gets rid of frost, ice, weld spatter, cutting chips adhered to the piston rod, and protects the seals etc.

Applicable Series

Description	Model	Action	Note
Ctandond tons	MB1	Double acting, Single rod	
Standard type	MB1W	Double acting, Double rod	

Specifications: Same as standard type

		[mm]
Bore size	Н	ZZ
32	47	135
40	58	146
50	67	165
63	67	165
80	81	199
100	81	199

19 Made of Stainless Steel (Combination of XC7 and XC68)

Symbol -XC65

Suitable for the cases it is likely to generate rust by being immersed in the water and corrosion.

Applicable Series

Description	Model	Action	Note
Standard type	MB1	Double acting, Single rod	Except ø125
	MB1W	Double acting, Double rod	Except ø125

How to Order

Standard model no. - XC65

Made of stainless steel

(Combination of XC7 and XC68)

Specifications

Parts changed to stainless steel	Tie-rod, Tie-rod nut, Cushion valve, Piston rod (with hard chrome plated), Rod end nut
Specifications other than above and external dimensions	Same as standard type

Maximum Stroke

Double acting, Single rod	Double acting single rod with rod boot
1600	1000

Symbol -XC68

20 Piston Rod and Rod End Nut Made of Stainless Steel (With Hard Chrome Plated Piston Rod)

Suitable for the cases it is likely to generate rust by being immersed in the water and corrosion.

Applicable Series

Description	Model	Action	Note
Standard type	MB1	Double acting, Single rod	Except ø125
	MB1W	Double acting, Double rod	Except ø125

How to Order

Standard model no. - XC68

Piston rod and rod end nut made of stainless steel (With hard chrome plated piston rod)

Specifications

Parts changed to stainless steel	Piston rod, Rod end nut
Specifications other than above and external dimensions	Same as standard type

Maximum Stroke

Double acting, Single rod	Double acting single rod with rod boot
1600	1000

Symbol

-X846

21 Fastener Strips Mounted on Switch Mounting Grooves

It prevents splashing water or windblown dust to the cylinder body from making an ingress into the auto switch mounting groove and accumulating.

Applicable Series

Description	Model	Action	Note
Standard type	MB1	Double acting, Single rod	
Standard type	MB1W	Double acting, Double rod	
Non-rotating rod type	MB1K	Double acting, Single rod	

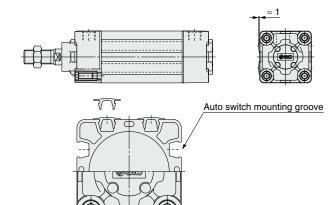

How to Order

Standard model no. - X846

Fastener strips mounted on switch mounting grooves

Specifications: Same as standard type

Dimensions (Dimensions other than below are the same as standard type.)

Fastener Specifications

Quantity	ntity 8 pcs. (6 pcs. when auto switches are mounted) Note)	
Material	Vinyl chloride	
Color	White	

Note) These cannot be installed on switch mounting grooves where auto switches have been mounted.

Series MB1 Specific Product Precautions

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For Actuator and Auto Switch Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on the SMC website, http://www.smcworld.com

Adjustment

⚠ Warning

1. Do not open the cushion valve beyond the stopper.

Crimping (Ø32) or a retaining ring (Ø40 to Ø125) is provided to prevent the accidental removal of the cushion valve. Do not open the valve beyond the mechanism. If air is supplied, the cushion valve may shoot out from the cover.

Bore size [mm]	Cushion valve width across flats [mm]	Hexagon wrench	
32, 40	2.5	JIS 4648 Hexagonal wrench key 2.5	
50, 63 3		JIS 4648 Hexagonal wrench key 3	
		JIS 4648 Hexagonal wrench key 4	

2. Use the air cushion at the end of cylinder stroke.

Select the cylinder with bumper if the cushion valve is to be fully opened. Otherwise, tie-rods or piston assembly may be damaged.

3. When replacing mounting brackets, use a hexagon wrench.

Bore s	size [mm]	Bolt	Width across flats [mm]	Tightening torque [N·m]
32, 40		MB-32-48-C1247	4	5.1
50), 63	MB-50-48-C1249	5	11
80, 100	Foot	MB-80-48AC1251	6	25
	Others	MB-80-48BC1251		
125	Foot	CE00008	8	30.1
	Others	CE00032	0	

4. When replacing mounting brackets, tie-rod nuts on the cylinder body become loosened.

After retightening the tie-rod nuts with the proper tightening torque (Refer to Adjustment 3.), mount a mounting bracket.

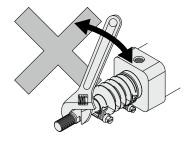

With Rod Boot

Handling

⚠ Caution

1. Do not turn the piston rod with the rod boot kept locked.

When turning the piston rod, loosen the band once and do not twist the rod boot.

2. Set the breathing hole in the rod boot downward or in the direction that prevents entry of dust or water content.

⚠ Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of "Caution," "Warning" or "Danger." They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

Caution: Caution indicates a hazard with a low level of risk which, If not avoided, could result in minor or moderate injury.

Warning: Warning indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

⚠ Danger: Danger if not avoided, will result in death or serious injury. **Danger** indicates a hazard with a high level of risk which, *1) ISO 4414: Pneumatic fluid power - General rules relating to systems.

ISO 4413: Hydraulic fluid power – General rules relating to systems.

IEC 60204-1: Safety of machinery - Electrical equipment of machines. (Part 1: General requirements)

ISO 10218-1: Manipulating industrial robots - Safety.

⚠Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/ equipment until safety is confirmed.

- 1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
- 2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
- 3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.

- 1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
- 2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalog.
- 3. An application which could have negative effects on people, property, or animals requiring special safety analysis.
- 4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

⚠ Caution

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.

If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.

If anything is unclear, contact your nearest sales branch.

Limited warranty and Disclaimer/ **Compliance Requirements**

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements".

Read and accept them before using the product.

Limited warranty and Disclaimer

- 1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.*2) Also, the product may have specified durability, running distance or
 - replacement parts. Please consult your nearest sales branch.
- 2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
- 3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.
 - 2) Vacuum pads are excluded from this 1 year warranty.

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.

Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

Compliance Requirements

- 1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
- 2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

⚠ Caution

SMC products are not intended for use as instruments for legal metrology.

Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

Revision history

Edition B * Non-rotating rod type: Changed from the current MB1K series to the MB1K-7 series
