Slide Unit CX2/CXWM/CXWL Series

Slide Bearing/CX2:ø10, ø15, ø25 CXWM:ø10, ø16, ø20, ø25, ø32 Ball Bushing Bearing/CXWL:Ø10, Ø16, Ø20, Ø25, Ø32

Provided with shock absorbers to absorb impact and noise.

The slide unit can absorb energy in a wide range, in high speed, low-load applications to low speed, high-load applications, without requiring adjustments.

Ensures high positional accuracy.

A high level of positional accuracy can be attained because the two parallel piston rods prevent the rods from rotating, and the workpiece mounting surface and the parallelism of the piston rods are made highly precise.

Auto switches can be installed.

Smooth operation and high thrust.

Series Variations

Mountable on the housing or on the plate.

The slide unit can be mounted on the housing or on the plate, depending on the application. It can also be bolted from the bottom or from the top. The piping can be fitted to the port in any of the three positions, according to how the unit is mounted.

@SMC

Note 3) The shock absorber is to be mounted on one side of the plate for the 25 stroke of the CXWM20,

CXWM32, CXWL32 series and the 50 stroke of the CXWM32 series

-X

CX2/CXWM/CXWL Series Prior to Use

Maximum Allowable Moment: CX2N, CXWM, CXWL

Operate within the operating range and under the allowable moment indicated in the table below.

CX2N

CXWM (Slide bearing)

Allowable Moment (M2) (N·m)

Bore size (mm)	10	15	16	20	25	32
CX2N	0.098	0.294	—	—	1.029	—
CXWM	0.108	—	0.549	0.809	1.029	2.695
CXWL	0.108	—	0.549	0.809	1.201	2.695

Note) M2 is steady regardless of the strokes.

Allowable Kinetic Energy

Load mass and cylinder speed should be observed within the range given in the graph below. To adjust the cylinder speed, use a speed controller.

1. Changing from the non-auto switch specifications to the auto switch specifications 2. Changing mounting type of the auto switch specifications

CX2 Series

1. In the CX2 series, to change from the specification without auto switch to the plate mounting type with auto switch or to the housing mounting type with auto switch, refer to tables (1) and (2) before ordering

2. In the CX2 series, to change from the plate mounting type with an auto switch to the housing mounting type with an auto switch or vice versa, refer to tables (1) and (2) before ordering.

Table (1) Plate Mounting Type with Auto Switch (CDPX2ND-D) Component Parts for Mounting Switches and No. of Component Parts

		ø10	ø15	ø 25				
0	Material	Assembly model no. for mounting switch						
Component parts	Material	CDPX2N 10S-	CDPX2N 15S-	CDPX2N 25S-				
Switch mounting block	Aluminum alloy	1	1	1				
Block mounting screw	Chrome steel/Zinc chromated	2	2	2				
Switch mounting screw	Chrome steel/Zinc chromated	2	2	2				
Hexagon nut	Carbon steel/Zinc chromated	2	2	2				
Magnet		1(2)(2)						
Socket	Carbon steel/Electroless nickel plated	2						
Plug	Carbon steel/Nickel plated	2	2					

Note 1) "
—" mark indicates strokes

Note 2) In the case of ø10, the 25 mm stroke has two magnets that are bonded in the holes on the side of the housing. Those with strokes of 50 mm to 100 mm have one magnet. Those with other bore sizes have a built-in magnet in their housings.

Component Parts for Mounting Switches and No. of Component Parts

		ø10	ø15	ø 25						
Component parts	Matorial	Assembly model no. for mounting switch								
Component parts	Wateria	CDBX2N 10M-	CDBX2N 15M-	CDBX2N 25M-						
Magnet mounting block assembly	Aluminum alloy	1	1	1						
Switch mounting rail	Aluminum alloy		1	1						
Spacer	Aluminum alloy/Anodized	2								
Block mounting screw	Chrome steel/Zinc chromated	2	2	2						
Screw for mounting rail	Chrome steel/Zinc chromated		2	2						
Switch mounting screw	Chrome steel/Zinc chromated	2	2	2						
Hexagon nut	Carbon steel/Zinc chromated	2	2	2						
Hexagon socket head plug	Chrome steel/Zinc chromated	2	2							

Note 1) "⊡" mark indicates strokes. Note 2) For ø10, CX2N10-⊡ can be changed to CDBX2N10-□, but note that CDPX2N10□ cannot be changed to CDBX2N10-□

** Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance. Consult with SMC regarding water resistant types with the above model numbers.

* Lead wire length symbols: 0.5 m Nil (Example) F79W

5 None N (Example) J79CN

* Refer to pages 1192 and 1193 for details of auto switches with a pre-wired connector.

* Auto switches are shipped together (not assembled).

* Solid state auto switches marked with "O" are produced upon receipt of order.

Made to Order: Individual Specifications

(For details, refer to pages 706 to 708.)

When operating an actuator with a small diameter and a short stroke at a high frequency, the dew condensation (water droplet) may occur inside the piping depending on the conditions.

Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to <u>the IDK series in the</u> <u>Best Pneumatics No. 6</u>.
