Features of EX510 series

Feature 1 More valves and sensors can be connected.

- The introduction of the **EX510** series makes it possible to connect more valves and sensors.

Compatible protocol	Current SI unit model
CC-Link	3 master stations 3 manifold
DeviceNet™	1 node 1 manifold
PROFIBUS DP	1 node 1 manifold

Compatible protocol	EX510 series
CC-Link	3 master stations 4 manifold/4-input unit
DeviceNet™	1 node 4 manifold/4-input unit
PROFIBUS DP	1 node 4 manifold/4-input unit

Feature 2 Connector cables result in wire-savings. (including power supply cable)

- A power supply cable for each slave unit was required in the past.

- With the introduction of the **EX510** series, only a power supply cable to the GW unit is required.

Connected to each unit is a branch cable which combines the cables for communication and power supply.

Feature 3 There is no need to set the address for the SI unit, output unit and input unit.

- Setting the address for each unit was required in the past.

- It is okay to set the address for the GW unit only.

Feature 4 Compact SI unit

- The SI unit which connects output devices such as a solenoid valve has a compact design, compared with a current model. (Compactness: volume ratio more than 60%)

Current model (EX120 series)

EX510 series

Feature 5 Can flexibly change to Field Bus.

- In the past, all the part numbers of slave units were needed to be changed by returning it to the manufacturer and reordering (re-estimate, delivery time) it.

- After the introduction of the EX510 series, only the GW unit needs to be changed.

Feature 6 Adoption of connectors which do not require any special tools for installation

No special tools are required for press-fitting the connectors for branch cable connections and the e-con connectors for sensor connections.

No need to strip the wire Only pliers are required for clamping.

The output unit adopts a spring type terminal box, eliminating the need to tighten any retaining screws.

Torque control, crimping work is unnecessary.
Screwless construction. No tightening of retaining screws required.

EX600

EX500

EX510

PCA
EX□

Feature 7 Cable length of up to 20 meters is available.

Various units can be connected within a radius of 20 meters around the GW unit.

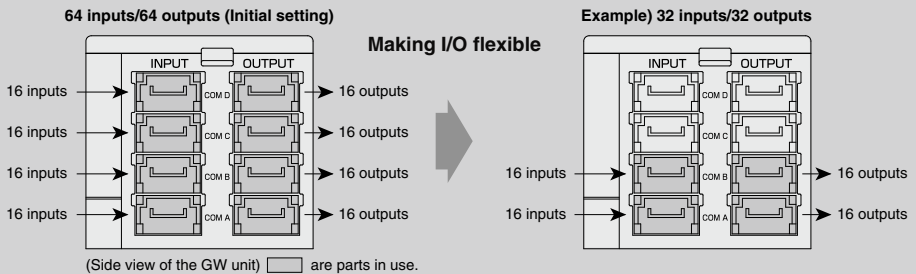

Feature 8 Delay in transmission of 1 ms or less

The delay in transmission between the GW unit and SI unit/Output unit/Input unit is 1 ms or less.

Feature 9 Making I/O flexible

The occupying number of points in the GW unit can be configured flexibly by setting a switch.

* Setting is different depending on the respective protocol. Refer to the specifications for details.

Feature 10 Effectively using the unused points of the SI unit

Valves which are independent from the manifold can be converted to serial transmission without purchasing new SI units.

Feature **11** Protection

Each unit is protected against a short-circuit from a power supply load.

Input/Output unit fuses are replaceable.

The short circuit protection is integrated for the SI unit.

Parts Description

Communication connector (1 pc.)

Power supply connector (2 pcs.)

Terminating resistor (1 pc.)
* Attached to EX510-GPR1 only.

Accessories

GW Unit

No.	Description	Applications
1	Communication socket (BUS)	For connecting with a network, using the communication connector (10), which is part of the accessories.
2	Power supply socket (PWR(V))	Supplies power for output devices, which have a power supply connector (11), such as a solenoid valve.
3	Power supply socket (PWR)	Supplies power for input devices, which have a power supply connector (11), such as a sensor.
4	Branch connector (for input) on GW unit side	Connects input units, etc., using a branch cable (EX510-FC□□).
5	Branch connector (for output) on GW unit side	Connects the SI unit (manifold valves) etc., using the branch cable (EX510-FC□□).
6	FG terminal	Used for grounding.
7	Mounting hole	Used for mounting the unit with two M4 screws.
8	Mounting groove for DIN rail	Used for mounting the unit to a DIN rail.
9	Display, Switch setting part	Displays the LED corresponding to the unit's condition, address setting, and the communication speed for the switches.
10	Communication connector	Used for connecting the network cable.
11	Power supply connector	Used for connecting the power supply cable.
12	Terminating resistor	Connects the terminating resistor to both ends of a unit in the transmission line.

Connection to Output Equipment

The output unit can be connected to 2-port solenoid valves such as the VX, VCW, VDW series and other 3-port valves. Pay attention to the applicable cable and maximum load current for selecting a solenoid valve. The 2-port valves other than shown below can be used as long as they meet the conditions; operating environment (enclosure, etc.), applicable cable and the **maximum load current**. Shown below is the typical 2-port solenoid valve. Additionally, we recommend a model with surge voltage suppressor is used for the 2-port solenoid valve.

Example) In the case of using 5 VX23 series (rated voltage: 24 VDC/ power consumption: 10.5 W) (calculated under the condition with 5 valves turned on simultaneously)

Operating current per point for a valve
 $10.5 \text{ (W)} \div 24 \text{ (V)} = 0.44 \text{ (A)}$ Meets the output unit load current requirement 1.

Therefore, the total current of the output unit is:
 $10.5 \text{ (W)} \div 24 \text{ (V)} \times 5 \text{ (pcs.)} = 2.2 \text{ (A)}$ Only the external power supply type can meet the requirement 2. The internal power supply type cannot be used.

Based on the requirement 3, The total current for OUT0 to 7 and OUT8 to 15 are 1.5 (A) respectively.

Therefore, 3 VX valves are wired for either 3 points of OUT0 to 7. (1.32 (A) for OUT0 to 7)
 2 VX valves are wired for either 2 points of OUT8 to 15. (0.88 (A) for OUT8 to 15)

Other outputs can be made available by reducing the total number of the occupied points for simultaneous operation.

Load Current Requirement

Model	EX510-DYN3	EX510-DYP3	EX510-DYN4	EX510-DYP4
Output type	Sink/NPN (Positive common)	Source/PNP (Negative common)	Sink/NPN (Positive common)	Source/PNP (Negative common)
Power supply type	Internal power supply (supplied by GW unit)		External power supply (supplied by power supply connector)	
Max. load current	Meet the following 3 conditions: 1. 0.5 A or less per point 2. 1 A or less per unit 3. Total current for OUT 0 to 7 must be 1 A or less. Total current for OUT 8 to 15 must be 1 A or less.		Meet the following 3 conditions: 1. 0.5 A or less per point 2. 3 A or less per unit 3. Total current for OUT 0 to 7 must be 1.5 A or less. Total current for OUT 8 to 15 must be 1.5 A or less.

VDW

Series	Body material	Port size	Orifice diameter [mmø]	Power consumption [W]
VDW10	A1, Resin C37, Stainless steel	M5 to 1/8	1.0 to 3.2	2.5
VDW20		One-touch fitting:		3

SI Unit

How to Order

EX510-S□0□1□□

Output specifications

0	Sink/NPN (Positive common)
1	Source/PNP (Negative common)

Mounting specifications

Nil	Screen mounting
A	Mounting on DIN rail vertically
B	Mounting on DIN rail horizontally
C	Mounting on DIN rail horizontally (Dedicated for the SJ manifold) ^{Note)}

Applicable valve manifold

1	Plug-lead manifold
2	Plug-in manifold

Note) Applicable for EX510-S□02 only.

Specifications

Model	EX510-S001□, S002□	EX510-S101□, S102□
Output type	Sink/NPN (Positive common)	Source/PNP (Negative common)
Number of outputs	16 outputs	
Rated load voltage	24 VDC	
Max. load current	Meet the following 3 conditions: 1. 0.25 A or less per point 2. 1.4 A or less per unit 3. Total current for OUT 0 to 7 must be 1 A or less. Total current for OUT 8 to 15 must be 1 A or less.	
Enclosure	Built-in short circuit protection	
Current consumption	50 mA or less (SI unit internal parts)	
Environment	Enclosure	IP20
	Operating temperature range	-10 to 50°C
	Operating humidity range	35 to 85%RH (with no condensation)
	Withstand voltage	500 VAC for 1 min. between whole external terminal and FG
Insulation resistance	10 MΩ or more (500 VDC) between whole external terminal and FG	
Standards	CE marking, UL (CSA)	
Weight	EX510-S□01: 40 g	EX510-S□01A, B: 80 g
	EX510-S□02: 50 g	EX510-S□02A, B, C: 90 g (including accessories)

EX510 Series

Parts Description

You can place an order for the manifold (valve series mentioned below) with the SI unit. For further information, please refer to the individual valve/manifold catalog. Also, you can change the system of your device by retrofitting the SI unit with the manifold already purchased.

EX510-S□01

(SY, SYJ, S0700, VQZ series)

EX510-S□01A

(SY series (Type 45))

EX510-S□01B

EX510-S□02

EX510-S□02A

(SY, VQ series)

EX510-S□02B

(SZ, SQ series)

EX510-S□02C

(SJ series)

Accessories

Branch connector (2 pcs.)
(EX510-LC1)

Connector lock pin
(1 pc.)

SI Unit

No.	Description	Applications
1	Branch connector on the SI side unit	For press-fitting the branch connector (9) to the branch cable (EX510-FC□□) for connecting with the GW unit.
2	Connector for connecting a load	Connects an output device such as a solenoid valve.
3	LED for power supply	Light ON: Power supply ON (Normal) state Light OFF: Power supply OFF state
4	LED for communications	Light ON: When receiving data Light OFF: When there is no communication data.
5	Mounting hole	Used for mounting the unit with two M3 screws.
6	Connector lock pin insertion part	Used for attaching a unit with a connector lock pin (10). (EX510-S□02□ is inserted.)
7	Mounting bracket	Can be mounted on DIN rail.
8	Covercion cable assembly	The cable assembly used for connecting to the plug-in valve manifold. (MIL connector, 20 pins, socket)

EX510 Series

System Composition/Options

① Branch cable

A 4 core flat cable is required for connecting between units.

How to Order

EX510-FC 10

Cable length (L)

01	1 m
02	2 m
05	5 m
10	10 m
20	20 m
60 (Note)	60 m

Note) Branch cable length is a maximum of 20 m. Use the cable by cutting it into lengths of 20 m or shorter.

② Branch connector (Unit 1 pc.)

Connector required for connecting a branch cable to each unit.

Two branch cables are attached to the SI unit, the input unit and the output unit respectively.

How to Order

EX510-LC1

(When press-fitting)

Electrical specifications	
Rated voltage	24 VDC
Rated current	Max. 5.0 A
Contact resistance	20 mΩ or less
Withstand voltage	1000 VAC 1 minute (Leak current 1 mA or less)

③ **Cable assembly for outputting**

Cable assembly for connecting the unused outputs in the SI unit.

How to Order

EX510-V S 10 S

Output	
S	1 point
W	2 points

Valve connector	
Nil	None
S	For SY, SYJ series
Q	For VQ, VQZ series <small>(Note)</small>

Cable length (L)	
10	1 m
30	3 m

Note) VQ is compatible with the positive common only.

EX510-VS□S

EX510-VS□Q

EX510-VW□S

EX510-VW□Q

④ **e-con connector**

Connector for connecting a sensor to the input unit (EX510-DX□□).
For applicable wire, refer to the right table.

How to Order

ZS-28-C □ □ - □ □

e-con

Applicable Wire

SMC part no. (1 pc.)	Cover color	Compliant wire diameter (φ)	Nominal cross sectional area (mm ²)*1	Tyco Electronics Japan G.K. part no.
ZS-28-CA-1	Orange	0.6 to 0.9	0.1 to 0.5 (AWG26 to 20*2)	3-1473562-4
ZS-28-CA-2	Red	0.9 to 1.0		1-1473562-4
ZS-28-CA-3	Yellow	1.0 to 1.15		1473562-4
ZS-28-CA-4	Blue	1.15 to 1.35		2-1473562-4
ZS-28-CA-5	Green	1.35 to 1.60		4-1473562-4
SMC part no. (1 pc.)	Cover color	Compliant wire diameter (φ)	Nominal cross sectional area (mm ²)*1	3M Japan Limited part no.
ZS-28-C	Red	0.8 to 1.0	0.14 to 0.2 (AWG26 to 24*2)	37104-3101-000FL
ZS-28-C-1	Yellow	1.0 to 1.2		37104-3122-000FL
ZS-28-C-2	Orange	1.2 to 1.6	0.3 to 0.5 (AWG22 to 20*2)	37104-3163-000FL
ZS-28-C-3	Green	1.0 to 1.2		37104-2124-000FL
ZS-28-C-4	Blue	1.2 to 1.6		37104-2165-000FL
ZS-28-C-5	Gray	1.6 to 2.0		37104-2206-000FL
SMC part no. (1 pc.)	Cover color	Compliant wire diameter (φ)	Nominal cross sectional area (mm ²)*1	OMRON Corp. part no.
—	Clear	UP to 1.5	0.08 to 0.5 (AWG28 to 20*2)	XN2A-1470

*1: Nominal sectional area is the value provided by the manufacturer.

*2: AWG size is a reference.

⑤ **Replacement fuse**

Replacement fuse for the input unit (EX510-DX□□) and the output unit (EX510-DY□□).

How to Order

EX9-FU10

Fuse rated current

10	1 A
50	5 A

Fuse

Part no.	Electrical specifications	
	EX9-FU10	EX9-FU50
Applicable model	EX510-DX□□ EX510-DY□□	EX510-DY□□
Rated current	1 A	5 A
Rated insulation capacity	48 VAC/DC 50 A	
Fuse resistance value	0.145 Ω	18 mΩ

EX510 Series

Ordering Examples

Shown is an example for ordering the EX510 series.

① Gateway unit (DeviceNet™ compliant)	EX510-GDN1	1 unit
② Branch cable 20 meters	EX510-FC20	1 roll
* ③ Input unit (1 connector, 2-input type NPN input)	EX510-DXN1	1 unit
* ④ Input unit (1 connector, 1 input type NPN input)	EX510-DXN2	1 unit
⑤ e-con	ZS-28-□	24 pcs.
* ⑥ SY series manifold	SS5Y3-42SA-08-C6	1 unit
	* SY3140-5LOZ	4 units
	* SY3240-5LOZ	4 units
* ⑦ VQZ series manifold	VV5QZ15-SA06C6	1 unit
	* VQZ1150-5LO1	4 units
	* VQZ1250-5LO1	2 units
⑧ SY series manifold	SS5Y3-42-02-C6	1 unit
	* SY3140-5LOZ	2 units
⑨ Cable assembly for output entry.....	EX510-VW10S	1 pc.
* ⑩ Output unit	EX510-DYN3	1 unit
⑪ 2 port solenoid valve	VX2120-02-5GS1	1 pc.

* Two branch connectors are attached to the manifold including the SI unit and two are attached to the input unit and the output unit respectively.
The branch connector (EX510-LC1) is used to connect the individual units.

EX510 Series

Specific Product Precautions 1

Be sure to read this before handling the products.

Design and Selection

Warning

- 1. Use within the allowable voltage range.**
Using beyond the allowable voltage range is likely to cause the units and connecting devices to be damaged or to malfunction.
- 2. Do not use beyond the specifications range.**
Using beyond the specifications range is likely to cause a fire, malfunction, or breakdown in the units and connecting devices. Check the specifications before handling.
- 3. Establish a backup system beforehand, which employs fail-safe concepts such as multiple equipment and devices to prevent breakage or malfunction of this product.**
- 4. Provide an external emergency stop circuit that will immediately stop an operation and cut off the power supply.**
- 5. When using for an interlock circuit:**
 - Provide a double interlock which is operated by another system (such as mechanical protection function).
 - Perform an inspection to check that it is working properly because it can cause possible injuries.

Caution

- 1. Keep the surrounding space free for maintenance.**
When designing a system, take into consideration the amount of free space needed for performing maintenance.
- 2. When applicable to UL, use a Class 2 power supply unit conforming to UL1310 for DC power supply.**
- 3. This product is one of the components to be equipped into a final equipment. Confirm the adaptability to the EMC directive as the whole equipment by customers themselves.**

Mounting

Caution

- 1. Do not drop, bump, or apply excessive impact.**
Otherwise, the unit can become damaged, malfunction, or fail to function.
- 2. Hold the body while handling this product.**
Otherwise, the unit can become damaged, malfunction, or fail to function.
- 3. Observe the tightening torque range**
Tightening outside of the allowable torque range will likely damage the product.
- 4. Do not install a unit in a place where it can be used as a scaffold.**
Applying any excessive load such as stepping on the unit by mistake or placing a foot on it, will cause it to break.

EX510 Series

Specific Product Precautions 2

Be sure to read this before handling the products.

Wiring

⚠ Warning

1. Avoid miswiring.

If miswired, there is a probability of damaging units or connecting devices.

2. Do not wire while energizing the product.

It is likely to damage the units or connecting devices.

3. Avoid wiring the power line and high pressure line in parallel.

Noise or surge produced by signal line resulting from the power line or high pressure line could cause a malfunction. Wiring of the reduced-wiring system and the power line or high pressure line should be separated from each other.

4. Confirm the wiring insulation.

Inferior insulation (contact with other circuit, insulation between terminals, etc.) will likely cause damage to the units or connecting devices due to excessive voltage or the influx of current.

⚠ Caution

1. Take measures to avoid applying repeated bending force or pulling force to the cable.

Also, pay attention not to place any heavy matter on the cable or clipping. It is likely to cause a broken wire.

2. Confirm grounding to maintain the safety of the reduced wiring system and for anti-noise performance.

Grounding should be close to units and keep the grounding distance short.

Operating Environment

⚠ Warning

1. Do not use this product in the presence of dust, particles, water, chemicals, and oil.

Use with such materials is likely to cause a malfunction or breakage.

2. Do not use this product in the presence of a magnetic field.

Use in such an environment is likely to cause a malfunction.

3. Do not use this product in an atmosphere containing an inflammable gas, explosive gas, or corrosive gas.

Use in such an atmosphere is likely to cause a fire, explosion, or corrosion.

This reduced-wiring system is not explosion-proof.

4. Do not use this product in places where there are cyclic temperature changes.

In case that the cyclic temperature is beyond normal temperature changes, the internal unit is likely to be adversely effected.

5. Do not use this product in places where there is radiated heat around it.

Such a place is likely to cause a malfunction or breakage.

Operating Environment

⚠ Warning

6. Do not use this product near sources that generate a surge which exceeds the benchmark test, even though this product is CE-marked certified.

The internal circuit components are likely to deteriorate or become damaged when there are equipment (solenoid type lifter, high frequency guided furnace, motor, etc.) which generate a large surge around the reduced-wiring system. Take measures to prevent an electrical surge and avoid having the wires touch each other.

7. Use the product type that has an integrated-surge absorption element when directly driving a load which generates surge voltage by relay or solenoid valves.

8. The reduced wiring system should be installed in places with no vibration or shock.

If installed in a place with vibration or shock, a malfunction or breakage is likely to occur.

Adjustment and Operation

⚠ Warning

1. Do not short-circuit a load.

If a load is short-circuited, excessive can cause damage to the connected devices. The fuse of the input unit will melt and below. The output and SI unit will activate its overcurrent protection function. However, they cannot cover all modes, so damage is likely to occur.

2. Do not manipulate or perform settings with wet hands.

Performing such activity will likely cause an electrical shock.

⚠ Caution

1. DIP switches should be set with a small watchmaker's screwdriver.

Maintenance

⚠ Warning

1. Do not disassemble, modify (including circuit board replacement) or repair this product.

Such actions are likely to cause injuries or breakage.

2. Perform periodic inspection.

Confirm that wiring or screws are not loose. Otherwise, unpredicted malfunction in the system composition devices is likely to occur.

3. When an inspection is performed.

- Turn off the power supply.
- Stop the supplied fluid and discharge the fluid in the piping and confirm the release to the atmosphere before performing an inspection. It is likely to cause injuries.

⚠ Caution

1. Do not wipe this product with chemicals such as benzene or thinner.

Using such chemicals is likely to cause damage.
