*1 The wiring can only be all double wiring or all single wiring. The number of manifold stations is limited by the number of outputs of the SI units and connector assemblies connected. For the single wiring specification, only single valves can be mounted. Double, 3-position, or 4 position valves cannot be used with the single wiring specification.

*2 The enclosure IP rating is for when the product's bottom surface is mounted on a cabinet or panel. Equipped with valves, the electric wiring side is IP40.

How to Order Manifold Assembly

Example (JJ5SY3-S51F-08B-01)

JJ5SY3-S51F-08B-01 ... 1 set (8-station manifold base part no.)
 * JSY3200-5U 4 sets (2-position double part no.)
 * JSY3A00-5U 4 sets (4-position dual 3-port (N.C./N.C.) part no.)
 → The asterisk denotes the symbol for the assembly.
 Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.
