Clamp Cylinder with Magnetic Field Resistant Auto Switch (Band Mounting Type)

CK1/CKG1 Series

as a standard for Y and YA.

Magnetic Field Resistant Auto Switch D-P4DW /Band Mounting Compliant

Band mounting of the magnetic field resistant auto switch $(D-P4DW\Box)$ to the CKG1 \Box series is possible by ordering the switch mounting bracket and the auto switch individually.

How to Order

Please order the switch mounting bracket, auto switch and clamp cylinder individually. Refer to the table below for auto switch mounting bracket part numbers.

| Part no. | Applicable auto switch model | Applicable clamp cylinder |
|----------|------------------------------|---------------------------|
| BA8-040 | D-P4DWSC | CKG1□40 |
| BA8-050 | D-P4DWSE | CKG1□50 |
| BA8-063 | D-P4DWL/Z | CKG1□63 |

Ordering Example

| Example case ① Cylinder: CKG1A50-50YZ1 |
|--|
| Example case (2) Magnetic field resistant auto switch: |
| D-P4DWSC2 |

Example case ③ Switch mounting bracket: BA8-0502

Note 1) Please order the same quantity for the switch mounting bracket and the magnetic field resistant auto switch respectively.

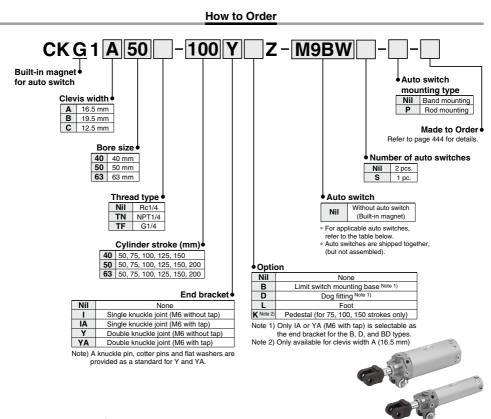

Note 2) Band mounting for the magnetic field resistant auto switches D-P79WS□, D-P74□ is not applicable.

| Applicable Magnetic Field Resistant Auto Switches | Refer to pages 1341 to 1435 for detailed auto switch specifications.) |

Note 1) As the switch bracket is made of polyamide, its performance may be affected by chemicals such as alcohol, chloroform, methylamines, hydrochloric acid, and sulfuric acid, so it cannot be used in environments where these chemicals come into contact with the product.
 Note 2) When mounting a D-M9⊒A(V) type auto switch, if the switch bracket is mounted on the indicator light, it may damage the auto switch. Therefore, be

Note 2) When mounting a D-M9
A(V) type auto switch, if the switch bracket is mounted on the indicator light, it may damage the auto switch. Therefore, be sure to avoid mounting the switch bracket on the indicator light.

Please contact SMC for detailed dimensions, specifications and lead times.

1 CK□1□40, 50, 63/With Air Cushion on Both Ends

Made to Order

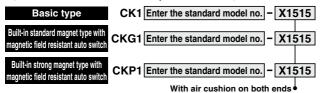

CK 1 Series

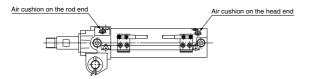

Clamp cylinder with air cushion on both ends (with cushion in the clamped/unclamped side)

A Caution

The air cushion is integrated in the unclamped side (head end) only for the standard type CK1/CKG1/CKP1 series, bore size 40, 50 and 63. When an air cushion is required on both ends, it is available as a made-to-order -X1515.

Dimensions: Same as standard type

Specifications: Same as standard type

Specifications

| Thread type | Rc1/4 only | | | | |
|---------------------------------|-----------------------|--|--|--|--|
| | | | | | |
| Specifications other than above | Same as standard type | | | | |

CK Series Specific Product Precautions 1

Be sure to read this before handling the products. Refer to page 9 for safety instructions and pages 10 to 19 for actuator and auto switch precautions.

Cushion/Speed Controller Adjustment

\land Danger

1. Retaining construction with crimping is integrated in the speed controller valve and cushion valve. However, do no rotate the cushion valve exceeding two turns, and do not rotate the speed controller valve exceeding four and half turns (ø40: maximum two turns). If 0.6 N·m or more of torque is applied, the valve may become loose and may jump out depending on the amount of air pressure.

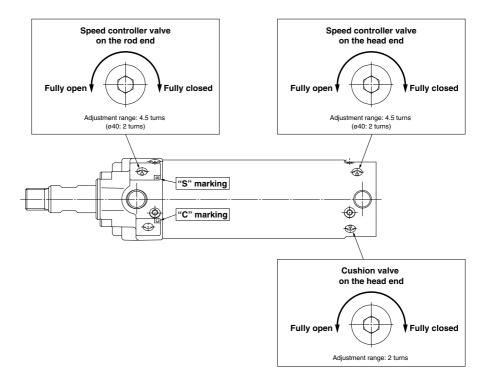

Cushion Adjustment

The air cushion is built in on the head end for the CK1 series. The cushion is pre-adjusted at the time of shipping. However, re-adjust the cushion valve on the tube cover depending on the operating speed and load before use. When rotating the cushion valve clockwise, the orifice becomes smaller, resulting in stronger cushion reaction.

Speed Controller Adjustment

The speed controller (exhaust restrictor) is built in on the rod and head end for the CK1 series. The cushion is pre-adjusted at the time of shipping. However, re-adjust the speed controller valve ("S" marking on the rod cover) on each cover depending on the operating speed and load before use.

When rotating the speed controller valve clockwise, the orifice becomes smaller, which reduces the speed.

CK Series Specific Product Precautions 2

Be sure to read this before handling the products. Refer to page 9 for safety instructions and pages 10 to 19 for actuator and auto switch precautions.

Piping Port/Switch Mounting Rod Location Change

Piping Port Location Change

Piping is possible from 3 directions. When the piping port location is changed, carefully follow the instructions as detailed below.

A Warning

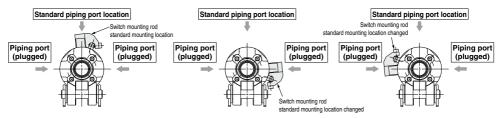

1. Do not leave out the component parts when the piping port location is changed.

Even if one of the component parts is kept away, malfunction may occur, resulting in dangerous operation.

2. To prevent air leakage, re-wind the pipe tape and fit into the changed location when the piping port location is changed.

Switch Mounting Rod Location Change

The switch mounting rod is mountable from 3 directions. When the switch mounting rod is changed, carefully follow the instruction as detailed below.

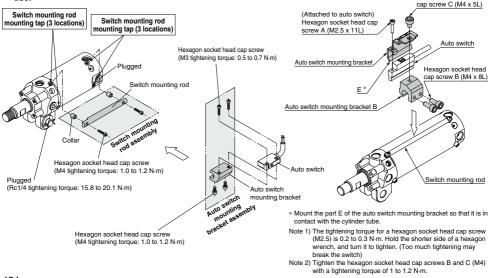

A Warning

1. Mount all the component parts to the changed location.

Even if one of the component parts is kept away, the switch detection error etc. may occur. (Switch mounting rod, switch mounting spacer, hexagon socket head cap screw)

2. After the switch mounting rod location is changed, confirm that there is no interference with other parts before use. Hexagon socket head

∕∂SMC

CK Series Specific Product Precautions 3

Be sure to read this before handling the products. Refer to page 9 for safety instructions and pages 10 to 19 for actuator and auto switch precautions.

Handling

Magnetic field resistant auto switches D-P79WSE/D-P74□ are specifically for use with built-in strong magnet type cylinders and are not compatible with general auto switches or cylinders. Built-in strong magnet type cylinders are labeled as follows.

> Magnetic field resistant cylinder with built-in magnet (For use with auto switch D-P7)

Mounting

- 1. The minimum stroke for mounting magnetic field resistant auto switches is 50 mm.
- 2. In order to fully use the capacity of magnetic field resistant auto switches, strictly observe the following precautions.
 - Do not allow the magnetic field to occur when the cylinder piston is moving.
 - 2) When a welding cable or welding gun electrodes are near the cylinder, change the auto switch position to fall within the operational ranges shown in the graphs on page 456, or move the welding cable away from the cylinder.
 - Cannot be used in an environment where welding cables surround the cylinder.
 - 4) If multiple objects that generate a magnetic field (such as a welding cable and a welding gun electrode) move close to an auto switch, the closest they are allowed to be to the auto switch can be calculated by multiplying the safety distance by the number of elements.
- 3. In an environment where spatter directly hits the lead wire, cover the lead wire with protective tubing.

Use protective tubing with inside diameter of ø8 or more that has excellent heat resistance and flexibility.

- Be careful not to drop objects, make dents, or apply excessive impact force when handling.
- 5. When operating two or more cylinders with magnetic field resistant auto switches in parallel and proximity, separate the auto switches from other cylinder tubes by an additional 30 mm or more.
- 6. Avoid wiring in a manner in which repeated bending stress or tension is applied to lead wires.
- 7. Do not use in an environment with constant water and coolant splashing.
- Be careful of the mounting direction of the magnetic field resistant auto switch D-P79WSE.
 Be sure to face the soft-resin mold surface to the switch mounting bracket side for mounting.

(Refer to page 448 for mounting example and page 1430 for soft-resin mold surface.)

Wiring/Current and Voltage

- Always connect the auto switch to the power supply after the load has been connected.
- 2. Series connection

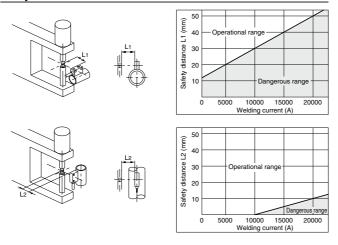

When auto switches are connected in series as shown below:

Note that the voltage drop due to the internal resistance of the LED increases.

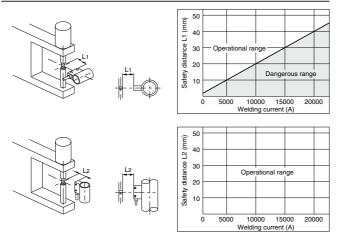

Data: Magnetic Field Resistant Reed Auto Switches (D-P79WSE, D-P74) Safety Distance

Safety Distance from Side of Auto Switch

Built-in standard (strong) magnet type without auto switch, with switch mounting rod

Symbol for the auto switch type is "P" as shown below. CKGA: (Example) CKGA80-50Y-P CKPA: (Example) CKPA80-50Y-P

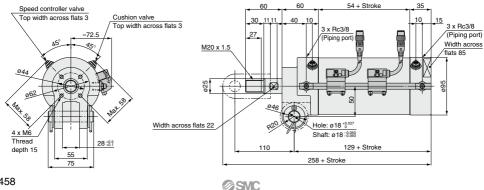

1 CKGA80, 100/CKPA80, 100/With Magnetic Field Resistant Auto Switch (Rod Mounting Type)

Dimensions

CKGA80 Built-in standard magnet type/with magnetic field resistant auto switch (D-P4DWSD)

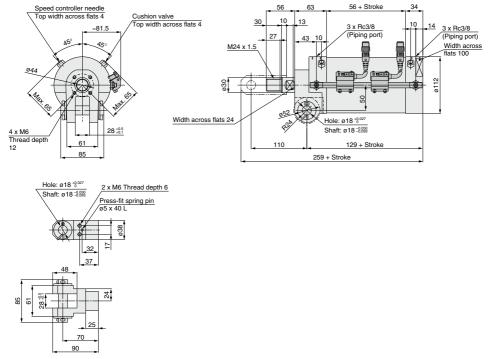

CKPA80 Built-in strong magnet type/with magnetic field resistant auto switch (D-P79WSE)

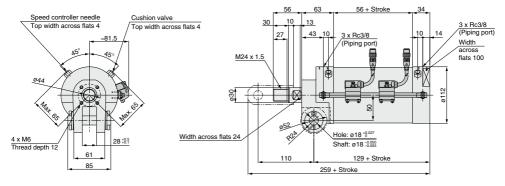

1 CKGA80, 100/CKPA80, 100/With Magnetic Field Resistant Auto Switch (Rod Mounting Type)

Dimensions

CKGA100 Built-in standard magnet type/with magnetic field resistant auto switch (D-P4DWSD)

Double knuckle joint

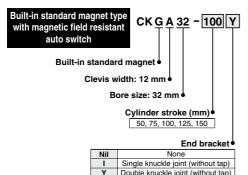

CKPA100 Built-in strong magnet type/with magnetic field resistant auto switch (D-P79WSE)

2 CKGA32/With Magnetic Field Resistant Auto Switch D-P4DW

Band mounting of the magnetic field resistant auto switch (D-P4DW) to the built-in standard magnet clamp cylinder (CKGA32 series) is possible by ordering the auto switch mounting bracket and the auto switch separately.

Y Double knuckle joint (without tap) Note) A knuckle pin, cotter pins and flat washers are provided as a standard for Y.

| Clevis width | 12 mm | CKGA32 series | | |
|------------------|---------------|-------------------------------|--|--|
| Fluid | | Air | | |
| Proof pressure | | 1.5 MPa | | |
| Maximum opera | ting pressure | 1.0 MPa | | |
| Minimum operat | ing pressure | 0.05 MPa | | |
| Ambient and flu | d temperature | -10°C to 60°C | | |
| Piston speed | | 50 to 500 mm/s | | |
| Cushion | | With air cushion on both ends | | |
| Lubrication | | Non-lube | | |
| Stroke length to | lerance | +1.0 | | |
| Mounting Note) | | Double clevis | | |

vote) A cievis pin, cotter pins and hat washers are provided as a standard.

| Applicable auto switch model | Auto switch mounting bracket part no. |
|------------------------------|---------------------------------------|
| D-P4DWSC | |
| D-P4DWSE | BA8-032 |
| D-P4DWL | BA6-032 |
| D-P4DWZ | 1 |
